This program may be the sexiest looking thing I've ever laid eyes on. The GUI is amazing and the way it organizes is amazing to. Also its super cheap so even if you don't DOX often this is still worth your money. I know people say, oh why would I buy this when I can just use Notepad. Well because thats to much work. Why not have a program like this one do it for you? especially since the price is nice.

VOUCH FOR THIS PRODUCT! :D

(Jun 28, 2015 09:40 AM)Supreme??????? Wrote: [\[CITE\]](#) If you're still giving out anymore vouch copies, I'd like to receive one. Thanks in advance.

Edit: I have received a copy and here is my honest review. Keep in mind that I'm in no way affiliated with Zac™.

To start everything off, the GUI is very sleek and clean. As explained in the sales thread, it organizes your DOX for you. Sure you can use Notepad or gedit, but for just \$2, you can make it look more professional and clean.

As of right now, DoxManager is still in beta. You may experience some bugs here and there. I've personally haven't experienced any problems yet.

Overall, this is a great product. For \$2, you can make your DOXing experience much enjoyable.

Good luck with the sales, Zac™! ?

Got the program, and it's really clean and simple.
Already tested the features, and everything works really well.
There's not much more to say than this, it works, it's clean, gg.

Kudos to you OP.

Don't know how to dox? Checkout my Advanced Doxing Ebook that's for sale on my profile.

Looks very nice to use but I'm not sure why people would buy this when notepad will do the same thing, maybe since its so cheap they will but there is not a lot of doxers on this forum

We're going to add several features such us:

- Uploading direct to certain sites
- Encryptions
- Several Tools
- and loads more.

It can be endless, and its just the convenience of typing in the information seperately, along with getting your directory and listing ALL your doxes there to manage with ease.
Makes things much more convenient and easier.

Have text boxes where you can enter things like:Instagram
Twitter
Facebook

etc.
Also, family, etc.

Hazy - June 28, 2015, 10:30 am

It looks decent but I don't really like how you can only use 1 template. From past experience all of my doxes look different and they are WAY more detailed than this.
The custom fields would look a bit messy imo.

We were hoping you would take advantage of the custom field inputs for that, if you type in a comma, that represents a line break and you can have as much as you want there.
Or move it to manage and edit, where you can freely edit the text.

Another future addition sir we were actually planning on having custom text designs, exactly to your likings.

I helped with this a bit and saw some of the backend and it is quite nice. Good luck with sells Zac.

What about a feature in which you can add your own sections?
If we can just add in with commas, it would be easier to use Notepad.
