Why do you want to go to jail for the rest of your life so you can impress your friends or change your grade?

Coobro - June 29, 2015, 2:31 am

You obviously don't go to University if you are this dumb to try hack a school computer.

This sounds like my country.
Anyway, just think about it, does it worth the risk to get caught for?
Also you don't know what to do, so even if you manage to do something, even if you think they won't give a fuck, you might be wrong and end in jail.

The first thing you want to do is not post incriminating information on a public forum viewed by 10's of millions of people per year.

After that, maybe start to study the target. See what you're dealing with, and then come back.

MysticHackz - July 9, 2015, 2:33 pm

Ok this kid above me talking about use a rat thats not going to fucking work. Now dude if you want to go to jail... cool follow this. First instead of coming on here and going everyone send me a tool called "hack123.exe" and do what ever the fuck i want. First we would need actual info on this pc, how does the universitys network actually fucking work??? Is there a server you run to log on from, what programs can you use.

Dude come back to us once you have real info, also email me if you want help
