I think it's not possible getting a 350\$ stub to get vouched by you eheh also he's already known

here so he doesn't need any vouch.

Alison Wonderland - June 29, 2015, 3:18 am

If this is really coded by the old warrior then its bound to be good

Aristocles - June 29, 2015, 3:48 am

You won't have a lot of customer there, 9 ppl out of 10 use .NET-coded malware and more and more infected computer are using Windows 8 - 8.1

The price stated for delphi is per month for 5 stubs. So with that price, you will get 5 unique stubs per month upon your request.

TOW cannot be doubted.

QU?CKSILVER - July 9, 2015, 6:51 pm

So basically how much do I need to pay to get the most basic thing out of this crypter?

?4???4?™ - July 10, 2015, 7:16 am

Thanks guys!

You buy the stubs, you got the crypter, with all the "basic thing" you need.

Btw, I'm alive, PM me for any sales inquiry.

No, it's on the thread. 350\$ is the least you can pay for 5 stubs throughout one month

?4???4?™ - July 26, 2015, 6:05 am

I'm online.

PM me if any of you interested in purchasing.

Demoralise - June 24, 2016, 5:48 pm

Expect nothing but quality from The Old Warrior and his friends, I would love to purchase this at some stage just to have a better understanding of The Old Warrior's quality coding. I probably wouldn't even really crypt files with it because I have no need. I would, but only to understand the quality and to perform AV tests and such - unless disallowed; I just want to understand the quality of this product to be honest.

kauf - June 25, 2016, 1:10 am

what i need to understand. will crypter be FUD for a Month? i bet not

xLelouch - June 25, 2016, 4:15 am

I don't think this thread is still active. (but the product is)

This crypter is something beyond your knowledge.

i am currently using a .net malware and .net crypter and yet not been able to get even one client/slave. many computer users today don't give a f**k about updating .net framework on their pc's because they don't even use it, they are concerned about just using internet browsing apps, adobe and ms word so if you target such users you end up wasting your time and money on .net tools because even if they execute your stub on their pc it will show error and you won't get logs unless they update.

Most pc users use win7 os, win8 os users are mostly those that just bought new pc (laptop)

correct me if wrong.

there are ways for run framework 4.0 framework file with framework 2.0 or framework 2.0 file with framework 4.0

You just need to do it yourself or in case you done know how to get this done, get a good crypter , and talk to the coder you want to do like i said above and he can get it do with an ease if he is a good coder.

NyQuil - December 25, 2016, 2:17 am

looks like his forum was hacked and his crypter and info is all being sold.

kauf - December 25, 2016, 9:13 am

by the way, isn't that too cost? \$350 for a month when you can get a better crypter. this is just selling fame not products. this is why he got hacked, i even read the crypter does not bypass most AVs runtime so what the HECK

Yes, it doesn't bypass Runtime :) and Scantime.

Yet, the kid trying to sell it, and claimed he has my source code lol.

Source was never uploaded anywhere :)

Forum was hacked due to my stupid hosting company.

It left the site open wide open while I was on holiday :)

Long story short. I careless about it. The site was only intended to an official site where I can post changelog from my crypter.

Hence the fact their was only few members active there.

Actually it's quite easy. But I can't recommend BroadCrypter. Price-performance is very very bad.
