How did I make my dork? Have kids. They are dorks. :P

All jokes aside - You just want to do things like on google changing the date from like 2005-2008 for a tonne of sql injectable sites.
:)

ProblemSolva - June 30, 2015, 6:10 am

for example if you know a website, uses index.php?id=5 for example then you can find similar ones by using inurl:index.php?id=, so with this knowledge and your imagination you can make other combinations.

N0c7urn - June 30, 2015, 8:21 am

Look at examples and base yours on them

Inurl :AndWhatYouWantTypeHere After Search

SiStemiC - June 30, 2015, 3:41 pm

Experiment different things. Like when I found a dork about radio stations its always fun :)

VanoxX - June 30, 2015, 7:01 pm

Takes a lot of learning bro just google stuff!

Cracking. - June 30, 2015, 8:51 pm

Code inurl:The inurl: tells the "dork" to search through url's to find a specific search.

So if you type in Code inurl:index.php?id=That will bring up all the websites with the "index.php?id=" in the url.

Those sites are mainly vulnerable to sql injections, so get creative and see what you can find.

Code intext:Intext: searches through a websites text to find something.
