Thread: [Jailbreak iOS 8.4](#)

angrymcdouble - June 30, 2015, 1:47 pm

[pictures incoming]

Apple Music, Beat 1 radio and a new music app are coming alongside iOS 8.4.

TaiG has released an untethered jailbreak for iOS 8.4, TaiG 2.2.0

[Link here](#)

To jailbreak, make sure:

- 1/ You disabled FindMyiPhone (Settings > iCloud > Find My iPhone >)
- 2/You disabled passcode and TouchID (Settings > Passcode > Enter your cod >)
- 3/You enabled Airplane Mode
- 4/You've updated by restoring/updating on iTunes and not OTA (on the device's settings app)

Open TaiG

Plug your iPhone, make sure it's recognized

Spoiler [\(Click to View\)](#)

Uncheck "3K assistant"

Click Start

Spoiler [\(Click to View\)](#)

Wait, and you're done.

Spoiler [\(Click to View\)](#)

Make sure to run Cydia while being connected to the internet.

-You can now turn your code, TouchID and FindMyiPhone back on.

Why is the restoration to factory necessary?

I jailbroke my iPhone on iOS 8.3 yesterday without restoring and it worked just fine...

?lood - July 1, 2015, 11:57 am

Nice little tut bro , this will be useful to someone.

It doesn't need to be restored just before, it's just that if you updated OTA, you'll have problems during the jailbreak process.

On an other side, the more thing you have on your phone, the longer it will take.

It keep doing the same work "Start... data procesing... restarting... continue to jailbreak... start... data procesing.. again and again" with 20% what is happening?

angrymcdouble - July 5, 2015, 12:05 pm

It did the same to me. Try to unlock the phone during the process..

Onetapped - July 8, 2015, 12:47 am

Got stuck on data processing
On 20%

angrymcdouble - August 14, 2015, 9:47 am

Never saw this post ^

Keep trying, and try to unlock the iPhone when the screen is locked, worked for me.
