Why does it say "Firefox has prevented the outdated plugin "Adobe Flash" from running on www.seriesforum.net."?

I want to join but this kind of worries me.

I don't use firefox, update you adobe flash and see if it works.

Why would you be worried the site is safe.

OP GL with forums. May I give you advice - be patient.

Good things happen to people that are patient.

But - don't think that apples will automatically start growing from trees.

SeriesForum is back?

The original owner got banned.... Hope it doesn't end up like that again.

Speaking of the original owner... What ever happened to BoomBoxes?

Boomboxes went off the forum scene, he lacked experience in handling situations where people would attack the website and such. He's not around forums anymore.
