Thread: [Select what's inside the \[code\] tags.](#)

Hash G. - July 4, 2015, 10:04 am

This userscript is made thanks to a suggestion, you can find it here : [Select all content on \[code\] tags](#) by [W?????](#)

I think the title & preview are self-explanatory.

GIF Preview : [\(Click to View\)](#)

How to install it :You will need to install a script manager :For Firefox, use [GreaseMonkey](#).

For Chrome, use [TamperMonkey](#).

Then, just go [here](#) and click on "Install this script", and then on "Install".

If you want to review the source, just click on "See the source of the script".

Let me know any bugs/ideas you want.

Enjoy.

My others userscripts : [\(Click to View\)\[Userscript\] HF TRUSTSCAN || ADD THE TRUSTSCAN & DEAL DISPUTES BUTTONS ON THREAD'S POSTS](#) by [Hash G.](#)

[\[Userscript\] HF AUTOSIGNATURE || INSERT YOUR SIGNATURE EVERY TIME YOU POST](#) by [Hash G.](#)

[\[Userscript\] Insert a custom text quickly in your posts and send it automatically.](#) by [Hash G.](#)

[\[Userscript\] HF currencyConverter\(\) || REAL TIME CURRENCY CONVERTER !](#) by [Hash G.](#)

Changelog [\(Click to View\)](#)1.0 : Initial release

Wardow - July 4, 2015, 11:17 am

Thanks a lot for this, helping coders a lot.

Thanks for your feedback :)

b?xxy - July 17, 2015, 9:18 am

Just saw this, might give it a try.

Really nifty, you should make one to copy the BTC address from the [btc] code.

How do you install a userscript on mobile ? ?

And no, or not at this time. I searched a bit and I'd need to have Adobe Flash / Java (can't remember) active and because of the security breach of both I'd prefer avoid it. That's also why when you cite with HFES you still need to ctrl+c yourself.

Thanks for your feedback ?ewfag ?

There's a jailbreak tweak for ios called [Userscripts Loader](#) (although it's supported only up until ios 7). I'm sure there are a ton of android apps/addons also.

Anyways, this a really useful tweak, thanks.

A noob guide I made years ago:

Now make one for Android noob.

A noob guide I made years ago:

You must be old school to be still on ios 7 :X...Or does the tweak work for 8+ as well?

Also, I found this gem for userscripts:

<http://www.mturkgrind.com/threads/which-browsers-can-you-run-userscripts-in-and-how.27432/>

It sucks, but it works?

You're forgetting this is android. There are multiple browsers across multiple devices across multiple versions. Please be more specific.

Thanks for the tip noob. I'll try it on phone as well.

Hash G. - January 24, 2016, 11:15 am

Well if you're into the coding section this would probably be useful to you.
