Thread: [Simplified Text Puzzle - Win \\$5 - Bitcoin and PayPal - Are **YOU** up to this?!](#)

Pixel5816 - July 4, 2015, 12:39 pm

[Want to win \\$5? Solve this puzzle and post the code here!](#)

I have created a new puzzle. There are absolutely no bugs in this version and it does have an online counter (that you can abuse by opening this in multiple tabs, I know and would appreciate if you didn't).

There are 6 Death Notes (books) that Misa has to find in this.
The map has been reduced from 18^2 to 9^2 , which is effectively 4x less area!

The first command to do is "help". Remember abbreviations! "walk north" can be sent as "w n" and "look around" could simply become "l a".

When you find the sixth Death Note, you will be granted the unique and secret key. The first challenger to post it in this thread will win \$5 in Bitcoin or via PayPal.

Good luck to you all. (Close the page and you'll lose your progress!)

I promise to keep this one up until it is solved. The other one went down because it had bugs etc :)

Lol, when I posted it in the other section, it had 10-15 people online.
Good luck!

It looks like we have a winner.
