Thread: [Debian7 Wheezy proxy problem](#)

philippxmaster - July 4, 2015, 2:59 pm

So i tried to install a proxy server on my debian7 server.

Problem is, that after executing "vim /etc/squid3/squid.conf"

I don't know how to jump to line 343.

Windows looks something like this <https://gyazo.com/2cc490bcf4ffe78df260c9a220326483>

Im using this tutorial <http://www.debianhelp.org/node/1713>

Im using this tutorial <http://www.debianhelp.org/node/1713>In Vim, you jump to a line

PHP Code

```
<?php
```

```
:343
```

Vim is love.
