New Skype: live:pelupiveh

Dragon. - July 4, 2015, 8:57 pm

Added you on Skype. Cheers mate. :)

ExaFLOPS - July 4, 2015, 9:08 pm

Adding you on Skype right now. Thanks!

Mcbride - July 4, 2015, 10:29 pm

Adding you over Skype shortly

Nicholai - July 5, 2015, 4:01 am

Been added by over 10 different members, so please send me a message with project details.

Nicktron - July 5, 2015, 7:53 am

Is the binary text actually saying something? :P

Nicholai - July 5, 2015, 7:59 am

Yes it is, the first red point is "free" and second one is "service" - In the middle it's just "coding" :)

Haha, just wondered, too lazy to check myself lol, thanks. :P

SIM-2508228 - July 5, 2015, 10:34 am

I messaged you on skype about this

Nicholai - July 5, 2015, 3:52 pm

Been getting too many requests about crypters, I will blacklist that for now, until I have a framework to build it on.

Nicholai - July 21, 2015, 1:21 am

Updated the thread.

I am no longer coding malware for free, both because of the many requests and the way people handle it.

--

Feel free to send me a PM if you need something done!

TehHaxx - July 21, 2015, 10:33 am

email checker?

Say you have a database full of emails and passwords in email:password format with proxy support

Checks the main emails such as gmail, yahoo, hotmail/outlook/live, aol, mail, gmx etc just as many email providers as possible.

That would be awesome!

IncarnatiOn - July 21, 2015, 11:56 am

League of Legends account checker:-

A little background:

Spoiler ([Click to View](#))

League of Legends is the biggest free-to-play game at the moment, it is also the biggest eSport at the moment. It is basically the most popular game of all time that is free-to-play and frequently updated (modern), and so, it gets a LOT of traffic.

The concept:

Spoiler ([Click to View](#))

Creating a mass-account checker, that checks user:pass format and sends requests to specific websources (or APIs, I can provide both) and simply show the output. Of course in an attractive GUI, will talk about that in a second. (I can help with graphics)

The idea:

Spoiler ([Click to View](#))

Plenty of forums (including this one) have huge traffic from League of Legends trading, but until this very day there has not been a single LoL mass account checker that's legit (except one, that is now discontinued and outofdate). So you're hitting a market that gets roughly ~200k views everyday with a product that is much needed and not provided anywhere else. Put simple: expect very, very big and quick profit.

If you like my idea please PM me your Skype, I can give you the conceptual design as I have programming background, you can at least consider it.

Edit: just incase I'm not clear, I'm looking to partner with you on this and split the profit. I guarantee you will not regret talking to me at the very least.

Nicholai - July 18, 2016, 1:04 am

Doing this service again.

Send me a PM or add me on Skype: live:pelupiveh

*****Wolf***** - July 18, 2016, 6:43 am

add'ed on Skype Sir!Thanks in advance!
