Thread: [tBlock - Blocks all unwanted forums and threads](#)

SIM-1676753 - July 5, 2015, 12:03 am

Hey guys, I'm here to share a userscript that I made. Basically what it does is it blocks forums and threads that you might not want to see from the search, forum display, and show display pages. It's simple to use, all you do is click "blacklist" on the navigation on a thread or section and it's blocked, easy as that. You can click the "Blocked" link to view and remove any forums or threads you might have blocked. I'm fairly new to Javascript so the source may not be the best, but I will continue learning!

Thank you for this contribution to the forums :)

I will try it out and see if it can help de-clutter things.

It's alright. Those who use it love it. ;3

Edit: I'm probably the one one using it.

I updated the script a little, not really sure if it's for the better. You may look at the changes in the latest commits.

Suggestion: Ability to block threads by username/userid.

Was just about to work on that.

Edit: Done. Should be in the latest commit.

Just to let you guys know, I suck at Javascript. There might be better ways of doing certain things so I wouldn't recommend learning from my code.

nice, cya monetizing techniques

why hate on shopping deals tho?

Fudster - September 22, 2015, 10:50 am

Goddd. This userscript is useful. I can block sections of the forum that I do not care about so I can see stuff I do care about. :D

Well..It only removes the thread. Any chance you could load the next page and put it there? Then again idk.

VolkoffHttp - September 22, 2015, 1:50 pm

damn blocking threads not working for me =D

More so for testing purposes. ?

No, because I view the second page and I don't want blocked sections threads to be shown.

It removes blacklisted threads/forums from the "New Posts" page, searches, forum display and thread display.

Well, I haven't had to update it yet so it seems to be working.

SIM-1676753 - November 25, 2015, 11:13 pm

Still works like a charm.

Great tool! Is there a way to hide whole forums? I like just 4 sections from different forums. I would like to keep only these as visible. Is this possible?

This still works? LOL

Lightning Bow - September 22, 2016, 11:55 pm

tried accessing the link and it doesn't work

i actually would love to have this

i see a lot of stupid threads from the same users on here

Had no idea such script exist.

Thanks a lot OP.

Night Fury - November 23, 2016, 10:40 pm

Good job on this script, Trvp. I like seeing the forum in all it's unfiltered glory, but this works well for anyone that has extreme disdain for a particular section.
