Thread: [Team logo for a semi professional team \[CS:GO\]](#)

Malcolm???????????????? - July 5, 2015, 4:55 am

This logo was our previous logo, which we are not that happy with, since the quality is low and the "Team Lukketid" isnt that big, so it wont be shown.

We are looking for a logo without the name of our team, but with a tiger, shark, bear you name it. If you could help me out, i would be great full.

EDIT: THE LOGO MOST CONTAIN THE TEXT "Team Lukketid"

What rank does the team consist of?

(sorry for the off topic question.)

Hey man,

I make 3 different logo's with "white tiger"

If your looking for a real logo instead of these posted above (with all respect to the designers but let's be honest looks like beginner design's / 5 minute design's) then add me on skype like i reply'ed above (AXwin.Graphics) the thing is i have several questions & to busy to go random gfxing without knowing if im going the right way with the design.

Pretty cool. Do you guys record your gameplay? If so, message me. I'd like to watch ;3

Hahaha alright then.

I'd love to see pentool work from you in 5 minutes.

i.imgur.com/P1Bm0Bf.png how long did it took you to make this then... basic grey background, few lines made & add 3 pics and you're basicly done... you didn't do anything major with this, let's be honest THIS can be done by a beginner, not saying that you are a beginner im just talking about this.

btw in my opinion this falls under the category "beginner" not 5 minutes work category. Anyways don't take it personally.

All five globals ofc, think we are semi pro with silver rank :D?

Thanks everyone for the interest, ill be looking forward to seeing what people come up with. The tiger concept at first was fucking sexy, "the claws".

Beginner haha, I do web design. I've designed for 5 years, if this was a paid piece of work it'd take up more time. Simple designs are more than often the best. Pen tool is hardly a beginner tool. Show us your work :)

i have almost 10 years of graphic experiences, websites, logo's, videos, business card's, poster's stuff like that & game graphics & models aswell, checkout my free gfx thread, re-building my portfolio atm after being out of tha picture for a while (been busy with game graphics since i was part of a game development team wich was aimed for mmorpg's)

The designed you showed could easily be made by a beginner you can denie what you want but it's true, no reason to discuss that & no simple design's are not more then often the best that's bullshit, im also not talking about pen tool but im talking about the design you sended it, could have done very easy don't denie that because it's true, if you decide to work with pen tool then that's your choice but deff unnecessary...

Off topic: If your avatar was made by you, I'm sorry, but all of these simplistic designs are 100x better.

On topic: I'm horrible at graphic design, I just came here to check out all these sexy things others made, then I noticed this argument.
