Spoiler ([Click to View](#)) Diggin' CPUs - Silent Miner Builder for CPU-only coins

Introduction

Bitcoin is a powerful yet difficult coin to mine. Probably you have been thinking about buying a Bitcoin Silent Miner but you have the following questions:

- Will I ROI running a silent miner on my botnet?
- Which pool should I choose to avoid bans?
- Is it profitable?

Definitely SHA256d and Scrypt CPU mining is dead. If you even try to ROI with some silent miners that claim to return your money back in some time, you're wrong and you will waste your money. Just check by yourself, there are farms that mine at 1 Phash/sec while you even with 10k computers would get around 10 Ghash/sec which is such a waste, don't you think?

What do you offer?

I offer a totally brand new, user friendly and easy-to-use silent miner builder for CPU only coins, meaning you will ROI in a very short period of time, and even earn a huge profit if you're intelligent. This CPU only coins have been chosen because they are profitable and they can make you return on investment.

Software Information

You have 3 tabs. Each one to build a silent miner. Currently this builder can make silent miners for the following coins, as you can see below in the image: Riecoin

XMG - Coin of the Magi

CryptoNote Generic Algorithm

This silent miner is only working with x64 processors, as x86 are a waste of worker's space. Riecoin and CryptoNote mining are focused on massive mining, meaning you can run your worker on multiple computers (same stub).

However, XMG is focused on selective mining, meaning it's not possible that you run same worker under many computers. You have to be selective and choose only the best x64 processors.

Pricing

\$5 Full lifetime license. Unlimited builds! No support on setting it up.

\$10 Full lifetime license + Support on setting up your botnet farm

I accept any kind of payment including:

- PayPal
- Bitcoin
- Litecoin
- Omnicoin

Vouch copies

I will give 3 copies to HQ members, so that they can test any silent miner on any R.A.T.

Total copies available: 0/3

What are you waiting for?

Start making a real profit from your botnet network!

Nixing - July 6, 2015, 7:33 am

I could request a vouch copy but I've never been into mining.

Good luck with your sales!

LordCoder - July 7, 2015, 3:26 am

Today is a great day for XMG mining. I'm going to show you how much can you earn if you take this silent miner.

Each x64 CPU might produce between 5-75 khash/sec depending on the processor. Let's say you have 10 CPU's ranging from a Pentium to Intel Core i7, making around 300 khash/sec. That makes you at the moment 12 XMG per day. At current market price:

$0.00005714 \text{ BTC} * 12 \text{ XMG} = 0.00068568 \text{ BTC}$ only having 10 computers online. If you're a massive spreader you could easily earn more.

Now think about having more computers! Start earning true profit. Remember there's a vouch copy left, so you can have it for free forever.

Alice. - July 7, 2015, 3:34 am

I will take a vouch copy. I feel like giving it a chance :)

?????? - July 7, 2015, 5:25 am

Diggin' CPU is one of the most stable miners I have ever seen. Its simple and yet sophisticated.

I just had to register on the pools (even the links are given in the miner itself) and input the credentials in the miner and just select whether I want it to run on startup or not. After you click the

builted file,it starts mining the coins at a profitable rate and yet is incredibly stable which is very hard to find among miners.Equipped to mine 4 type of cryptocurrencies,with a few spreading its definitely a money-making machine.So don't waste your time and get this tool as soon as possible,unless ofcourse if you dont wanna earn big bucks !!

Rapierz - July 7, 2015, 5:56 am

If there's a vouch copy left I will take one

ProtectNull™ - July 7, 2015, 5:58 am

I have questions, what coins are profitable with this?

LordCoder - July 7, 2015, 6:08 am

(Jul 7, 2015 05:56 AM)Rapierz Wrote: [\[CITE\]](#) If there's a vouch copy left I will take one
Sorry, already taken. I'm going to see if all the members give a review.

(Jul 7, 2015 05:58 AM)Matthewbmx™ Wrote: [\[CITE\]](#) I have questions, what coins are profitable with this?

All of them are profitable, at least better than Bitcoin. That's why I have included 3 silent miners in one.

Thread design is ready.

spidum - July 8, 2015, 3:28 pm

Wow finally a useful silent miner. Let me know if your vouch copies fall through, if not I'll still probably come back and buy it.
GLWS!

Product: [Diggin' CPUs](#)

Developer: [LordCoder](#)

--

I received a vouch copy of this silent miner a couple of days ago, but as my RAT was down, I was unable to write a review until now.

The developer has put up with me through these past few days, and not only walked me through the set-up of this miner, but fully explained how it works.

Even though It's extremely simple and requires a minute of setup time, I managed to mess it up, and LordCoder gladly helped me.

This product has a low cost, It's fast, clean, simple, and effective.

Within minutes I was able to get mining with the a few test slaves.

Spoiler [\(Click to View\)](#)

This is a quality product, and if you're looking to mine effectively, definitely consider this!
For \$5, this is a steal.

Its very nice, I like the multiple miners in one.
I have bought it, works great.
Best of luck with your sales.

Thanks for recommending it!

LordCoder - July 16, 2015, 5:53 am

I've changed to Paylvv so that you can purchase with Litecoin and Bitcoins, and of course PayPal.
Check it out.

420 Lord - July 16, 2015, 7:26 am

Seems like an awesome tool, can I mine dogecoins with it?

LordCoder - July 16, 2015, 9:41 am

(Jul 16, 2015 07:26 AM)Ale?G?cr??? Wrote: [\[CITE\]](#) Seems like an awesome tool, can I mine dogecoins with it?
Dogecoin is a Script coin, useless with botnet mining. You will waste your computers. Instead, this mines a CPU only coin making it more profitable.
You can add me on Skype if you need some details.

?Cyber - July 16, 2015, 6:46 pm

Interested in this might purchase in the near future.
You can thank Aquri for his thread, only reason I would've even looked at these coins haha.

Of course these coins are rare, and this miner is new. The popularity will surely grow when more people see this miner's value.

WaveRyder - July 17, 2015, 10:56 am

I just paid for this and am waiting for the product to be delivered, Thanks.

Delivered to your PM. Thanks for purchasing.

LordCoder - July 21, 2015, 2:40 pm

Online and taking orders. Take your cheap copy of an easy-to-use silent miner.

BI?ckhat - July 22, 2015, 2:29 am

Posting because I may buy soon if I can get a lower price that includes support <3

LordCoder - July 22, 2015, 9:01 am

Well, we can discuss it via Skype.

ketsugo - July 25, 2015, 3:07 am

you have gained an extra customer as nobody has made a negative comment regarding your miner and I can see the price rising in the future as it gains popularity.

Nice to hear your interest in this software. Thanks.

LordCoder - August 4, 2015, 3:30 pm

Still selling this, get your copy and make some cash.

gnmmarechal - August 6, 2015, 10:28 am

Amazing! I'll buy it as soon as I manage to get some \$.

LordCoder - August 17, 2015, 7:06 pm

Still works perfectly. XMG mining has been very active this weeks and with nice prices.

gnmmarechal - September 18, 2015, 9:18 am

Thanks, amazing product and friendly seller!!!

stackoverflowin - October 20, 2015, 6:54 pm

Is that Bitcoin figure per day?

Barbaros-DZ - October 20, 2015, 6:59 pm

Looking for vouch copy bro

LordCoder - October 21, 2015, 6:24 am

(Oct 20, 2015 06:54 PM)StackOverlowin Wrote: [\[CITE\]](#) Is that Bitcoin figure per day?

It increases and decreases depending on the network hashrate. If you want more information about the coin itself, you can check the official thread:
