Thread: [Black hat hacking group recruiting .](#)

Fiachra - July 6, 2015, 9:35 am

My team are recruiting (we are not releasing the name here just incase)

We dox / ddos / hack sites

So far we havent done much but we did dox OurMine (only members can see)

Anyway here is the form for anyone who wanna join

Can you dox ?

Have you ever been doxed?

Are you doxable?

Can you ddos?

Can you hack a website?

If so what do you use to find exploits?

What do you use to exploit the site?

i will pm you for your skype if i want to recruit you and we shall chat there.

Help me I am not good at hacking and I have been laughed at many times because I want to learn and I said I will go out and I will meet people who will teach me hacking and I will be able to feed my family and take care of myself in this life ,I have been through alot and I am not saying you should help me because of my story but help me because I came to you for help and I will forever owe you my life.

rico

Can you dox ? Yes

Have you ever been doxed? No

Are you doxable? In theory yes but the data one can find do not correspond/add up to something specific

Can you ddos? Yes

Can you hack a website? Yes

If so what do you use to find exploits? Nmap, nikto etc.

What do you use to exploit the site? Depends on the vulnerabilities - google can be a great friend there sometimes!

I would really wish to join your group I plan to be active and participate in all group related activities. Please note that this is a newly create HF account.
