Thread: [ActiveAim \ Triggerbot \ RCS \ Radar \ BHop \ SALE \ \\$6.95 \ LIMITED SLOTS](#)

**Tostig** - July 6, 2015, 9:42 pm

The only way to purchase is manually through Skype or HF PM.

[Video: <https://www.youtube.com/watch?v=yLjYaOqK-Dg&feature=youtu.be>]

Undetected from Facelt, CEVO (Without Radar), MM, and VAC.

Slots available: 26/45

I recommend not using the config that is included with the download, use this one instead:  
<https://www.dropbox.com/s/cz29dhrgrjlr9s/default?dl=0>

If you would like to purchase with CS:GO Skins, please add my Skype.

IF YOU DO NOT HAVE A BASIC GRASP OF ENGLISH OR HAVE A BASIC UNDERSTANDING OF HOW TO USE A COMPUTER, CHANCES ARE THAT I WILL NOT BE ABLE TO GIVE YOU PROPER SUPPORT.

Received a vouch copy, to be honest this is a very simple but amazing triggerbot and all the features included, this is for legit play and I can honestly say this is worth the buy. Seriously, don't hesitate it's perfect for closet cheaters.

Vouch for this, This is definitely another HQ product from Viktor :D

**Convictus** - July 8, 2015, 9:40 pm

Spoke to user about Sound ESP being added. He was very professional and gave me a quick response.

I plan to buy from him as soon as ESP is available! ?

Thank you both for your feedback on ActiveAim. :)

**Romochild** - July 9, 2015, 4:48 pm

If an aimbot is added I'd purchase asap.

Aimbot with:

FOV (I use .5/1 fov is what I use)

Smooth

Bone

Built in RCS for the aimbot?

If not then just pSilent with FOV/Bone/Chance(not necessary)

That'd be all :)

**Tostig** - July 10, 2015, 1:06 pm

Cleared up issues with DanketyDank and his cheats, we are open for sales again.

**Tostig** - July 11, 2015, 1:29 pm

Going on sale, reduced price to \$8.99 for 1 month!

**Tostig** - July 13, 2015, 1:28 pm

Working on acquiring a unique build generator so that I can sell unique builds. I will remove NetSeal soon and replace it with HWID.

**Tostig** - July 14, 2015, 8:54 pm

Updated the prices to accommodate the CS:GO cheat market being quite saturated.

**Tostig** - July 17, 2015, 5:03 pm

No. PayPal has fucked me many times and I have had it. I've had several limitations that ended in a permanent limitation that I am currently fighting. I can't believe they permanently limited a STUDENT PAYPAL ACCOUNT. They are crooks and don't deserve my money. Unless I can get my PayPal account back, I will not offer PayPal as a payment option. It is too prone to fraud. Plus, my full name and information is attached to my PayPal account and I don't feel like being doxed.

As of now as the cheat is new.?

**kingwall123** - July 22, 2015, 7:23 pm

ActiveAim is a good hack, good to play legit the trigger bot hits everytime not like other hacks ...

all feature's works good very smooth and dont look suspect.

for 7\$ you will never get a better legit hack.

the support is great never have better support.

Vouch for this, This is definitely another HQ product from this seller <3

**hieu12** - July 22, 2015, 8:07 pm

Has anyone ever gotten banned from this? The hack is fairly new but VAC bans are delayed so you never know when it's actually been detected. I might be wrong about the detection tho as I haven't been in the cheating scene for a long time. I might buy this soon tho, its very neat.

I test the cheat every 3 days on one of my accounts and only use it on that account to eliminate all possible variables. In the event that the cheat is detected, all users will be notified by NetSeal and have their licenses temporarily locked in order to fight the possibility of more bans. I will then update the cheat and unlock all licenses. ?

The only case of a ban I have on record is someone that was Overwatch banned from playing with 1ms delay and cornering really hard.

Purchase this great cheat while you can, I've tested it numerous times in COMP, and it works like a charm.

Viktor also gives top notch support, and even gives you great tips on how to avoid getting smacked with an OW ban. Also, any question you have he will give a very nice explanation.

10/10

Good luck with sales Viktor!

A lot of you have requested the bunnyhop 9 spamming issue to be fixed, that's done. RCS was causing an untrusted ban and that will be fixed as well. Decided not to use ESP because I got complaints of Overwatch bans, I'm just going to stick with radar. Bear with me everyone, the cheat will be up soon.

Limited amount of users and licenses. If a person wishes to extend their license time, then that will take up a slot each time they do so. It's more cost-effective to just use a custom authentication system.

Despite it being cracked and published on another website, there have been no VAC bans yet. However, the VAC wave just happened, and it is likely that the cheat is just undergoing a delayed wave.

Leaving NetSeal should be an obvious choice. If you respect your own cheat you would do so.

Quite obviously. The only issue I'm having is figuring out how to migrate everyone. Manually is definitely an option, but I don't know how many of my customers would be willing to do so.

Keep in mind, everyone that has bought ActiveAim will have their license renewed because of the inconvenience. If you bought 30 days, you will receive a 30 day subscription the day that you migrate.

Create a token based registration link for your auth system, so that you can easily get customers signing up for your cheat.

Ugh do you have any idea how long this is going to take? It's been almost a month, and I'm kinda disappointed. But hey I don't know how long it actually takes to make a cheat.

**Annoited** - August 29, 2015, 8:37 am

Is this an external cheat, and also does it support Windows 10 64 bit?

**Tostig** - September 1, 2015, 5:51 pm

I have no time to run this anymore. I will possibly sell the project, in which case the 2 contest winners will still receive their copies of ActiveAim. (Quinn. and JoomlaHQ)

If thats the case is there a chance him and I could get a private build? I was under the impression the cheat was almost done, it just needed a new licensing system. I've been waiting for a month now on this, but I do understand your troubles.

Private build shouldn't be a problem, but the RCS may still cause an untrusted. Hit me up via Skype.

I'm probably not selling it.

Edit: I've just updated the application, everyone log in to NetSeal! Everyone that has purchased has been upgraded to lifetime. To migrate to the new licensing system, update by first logging in to your old NetSeal version of the application, and then run the aarevamped hwid generator.exe and PM me the result, along with the NetSeal username you used to purchase. RCS is untested, and unique

builds are now generated upon run, which should lower your chances of getting banned. In the future, I will add junk code and the likes. Happy hacking!

**Tostig** - September 4, 2015, 5:31 pm

Tomorrow I will push an update that changes the update system and removes the aimbot class from the cheat, as it isn't being used at the moment.

Not for sale anymore, it would not be right for me to still be selling licenses for this because I am selling the project and ownership.

Do you have \$175 BTC? Someone has already contacted me. If he doesn't buy it, I will sell it to you, Ian.
