Thread: [>> ChunkSOURCE << Unique Stresser Source - 2FA, Scheduled Attacks, Decide Your Price!](#)

c x y k - July 7, 2015, 2:24 am

Hello, this will be the sales starting thread of Chunk Source, a new and unique Stresser Source developed by myself.

Source completion is about 85%, I'm just finishing off perfecting it. You may wish to reserve a copy of the source, or wait until it's fully released.

Text ([Click to View](#))Features:

- Accountless System - Unique Cookie Authentication
- Simple Setup - Drag the files to your server, you're ready to go. No file modifying or SQL uploading.
- Fully Unique - I can guarantee that this source is completely unique. I've coded it from beginning to end, with no use of third-party stresser sources.
- Modular - Quickly enable/disable parts of the stresser.
- Included domain resolver, skype resolve and IP Logger.
- Scheduled boots.
- Attack cooldown.
- OMC/PP/BTC payment support.
- Account limiting/banning.
- Regular, Support and Admin account status.
- Server Status.
- Server Rotation.
- Method Rotation.
- Server and method matching.
- Edit Profile.
- Transfer accounts to different devices.
- Statistical graphs.
- Private versions.
- Automatic account expirations.
- Detailed plans, advanced plan features.
- Limit areas to specific plans.
- Captcha Limitation.
- 2FA
- Much More.

That list is just the start of what Chunk offers. There's so much more, which will be documented later.

More information will be posted soon. You decide what you pay. Private versions can range from \$200-\$400, roughly; depends on what you want. Could be lots more, or lots less. BTC, only.

Any questions, please post on the thread. PMs will be ignored. If you have a question, it's likely that somebody else could be wondering the same thing. I want to answer as many questions as possible, and have people see said answers.

Bug Bounty Program: Find a security hole in the source? Send it my way, you can receive up to \$50.

Good luck with this project.

For anybody wondering, I've seen him code this live and I know it's a very HQ source.

**c x y k** - July 17, 2015, 5:07 am

I'll add the PayPal Merchant support as Understalker suggested, and I've also just added 2FA.  
Working on scheduled boots next.

Cheers for the vouches! :)

What would be everybody's opinion on a client? Thinking of creating a multi-platform client that'd link to the source.

Haha, cheers. Only took 5 minutes to implement, so thought why not. I'm going to probably write a client to connect to the source too, and I need to do scheduled boots. Client can be a separate project however.

**c x y k** - July 20, 2015, 4:13 pm

Finishing off the attack system and then we're pretty much finished. Hoping to have this finished in a few days.

**SIM-1567847** - July 25, 2015, 11:54 am

Vouch for Kondax user smells like hot dog water but it's okay because this is a sexy source.

**SIM-2223238** - July 25, 2015, 11:58 am

he showed me this source and it made me so wet.

I might remove the accountless functionality, and rather add in account login/register system back. Not sure, anybody could provide feedback?

Yea add the login thingy pls

**HIGH PAID FELLA** - July 30, 2015, 5:45 am

Would you also do redesigns of current stresser sources so we get the same layout as yours? Lmk your price via PM.

I'm working on another source, will add that to the next release.

Closing sales for now. If you're interested in private development, pm me.
