I have recently set up a Hummingbird account but I don't have a lot of followers right now so I thought maybe I could do a follow4follow service.'

Link: hummingbird.me/users/iHentai

P.S: there are only like 5 animes on it right now because I was too bored to add more. :P

Why would you use that retarded site? Use MAL instead.

MyAnimeList seems old and everyone is getting into Hummingbird lately...

MAL does indeed seem old, and HB is way more of a community than MAL is. MAL has forums but Hummingbird has much more interaction between the users

So everything which is old is bad? Hummingbird is the place people go to when they don't know about MAL.

Lol you have Hummingbird in your sig, rip.

RainbowHentAi - July 8, 2015, 3:42 pm

I don't know much about hummingbird except its [filter](#), which is useful for finding anime

I agree with tweety, HB sucks horse cawks.

Lyrlei - July 8, 2015, 3:47 pm

my hb is old add my mal instead

but if u insist

Hummingbird is like Facebook for virgins. Stick to MAL if you want a reliable tracker.
