Thread: [\[FREE\] Simplistic Booter Source - Layer 4 and 7 - UNRELEASED - HF Exclusive](#)

Down Quark - July 8, 2015, 8:36 pm

This booter source was just a test to see if I could make one. It is really easy to do and I did it! You may want to add WAY more and this theme has the room. If anybody wants any of the the other design pages lmk.

This source looks real nice so go ahead and use it. I can make private ones if you want.

Looks good mate, although I don't use things like this.. I'm sure it'll help some people.

Enjoy your first reputation.

Thank you.

I will be making more projects like this for the community!

Victini - July 9, 2015, 7:18 pm

Not bad man :P And your service for \$20, seems like the best deal i have seen on HF lol! GLWS, may even just get this myself for the lols one day :)

NervyGunSage - July 9, 2015, 7:20 pm

Looks nice hope its strong hitting.

Sources do not have APIs included, but any range of APIs from 100Mbps to 100Gbps with Joomla can be implemented.

If you PM me I am unable to reply so please provide a skype!

Down Quark - July 12, 2015, 8:31 pm

I have updated this and would be willing to release the update if anyone was interested.

prof.dracula - July 15, 2015, 12:04 am

Thank you for the share. Keep up the good work.?

Thanks I work hard on my sources.

KaliKid - July 15, 2015, 12:04 pm

thanks hopefully i can add some stuff to it!
