Does anyone know a free screen recorder that has no watermark/text when you record? If so please name it ?

Ganja Man - July 9, 2015, 11:38 am

Camtasia Mate. i remember using it and it never had water mark or text on screen :)

You guys are all horrible! Download OBS

<https://obsproject.com/>

Supports 1080p - normally used for streaming to twitch and what not but works amazing for recording video :)

giantblock208 - July 9, 2015, 12:17 pm

I might just use OBS I use it to stream anyways
