Thread: [\[Guide\] Free Rat Spreading Guide And Tips](#)

Niko - July 9, 2015, 6:49 pm

Rat Spreading Guide

This guide is going to cover a whole bunch of ways to spread your rat

Method 1

USB Drop

What you are going to want to do, is buy a bunch of cheap USB's from your local store, the cheaper the better, you can also order them in bulk online. Once you have a bunch of USB's, label each one with something that sounds interesting, such as "Private" "Pics" "Work". For each usb, you are going to want to name your stub "(Name Of Label) Client.exe" That will give you the best chance of infection. To spread this, you are going to want to place them on benches, seats in shops, floor of school and your schools lost and found.

Method 2

Youtube

This method is very saturated, but still works great! Make a youtube video about a hacktool that people may want, make sure to include a demonstration of it in the video. Bind your stub to it, and upload to a file hosting site. In the description, make sure to include a brief description of the tool and the link.

Method 3

Yahoo Answers

This method is Semi-Saturated, but still works good. What you want to do, is go to the computer help section and look for someone that needs help finding a program. Once you find a suitable question, rename your rat to the program that person is looking for, and also put a relative Icon on it too. Reply with the link to the download.

Method 4

Blog/Site

Make a website/blog on a new upcoming game, and convince people that it is a pre release/leaked beta version of it. Make sure to use a file Pumper to make the file 30-200Mb so it looks legit.

Method 5

Gaming Forums

One thing you can do is spread on forums. You will want to go to a gaming forum (Cant list any I remember) and make a post about a bot/cheat/hack for that game containing your rat.

Method 6

Minecraft

A Good way to spread on minecraft, is with "External" hacked clients. You will want to go to a minecraft forum, and post about your "External Ghost Client". At this point and time, everyone is looking for a good ghost client. Tell them, "To install it, make sure to put it in a place that nobody else would find it, and minecraft Has to be on the launcher screen when ran."

Method 7

PasteBin

Pastebin is a great place to spread because of how many people are on it. Your best bet would be to upload a java rat to a file hosting site, then on pastebin, explain a bunch of stuff about it, such as features etc. Such as a minecraft cracker or Account gen.

Tips

USB: Make sure not to be seen when doing this

Youtube: Make sure to delete negative comments on your download

Yahoo: If someone says not to trust the download, tell them to try it for themselves

Pastebin: If you run out of pastes for the day, simply use a proxy

Make sure your stub is FUD for the max amounts of infections

File Hosting Sites

<http://rghost.net/>

ChangeLog

Described pastebin method more thoroughly

I hope you all enjoyed this little spreading guide, and also hope it helps you out with spreading.

Armada - July 9, 2015, 7:05 pm

I can see this guide being very handy for the new users out there.

Thanks for the share man. ?

Niko - July 9, 2015, 7:07 pm

Just doing my best to help out the community ?

KingV - July 9, 2015, 7:53 pm

Hey man would you care to help me with a few test installs? I have everything ready to go just need some test installs to make sure my crypted file is functional, do you have a Skype?

d4rkito - July 9, 2015, 8:01 pm

Don't fucking upload to Mediafire, lol. Mediafire distributes samples to AV's.

Bo Burnham - July 9, 2015, 8:52 pm

Mediafire does indeed distribute.

Use either <https://www.google.co.uk/drive/>

<http://directexe.com/>

<http://rghost.net/>

All of the above work just fine and do not distribute.

I'm also going to need to do that USB method ? I'm interested in how well it would do.

d4rkito - July 9, 2015, 8:57 pm

I'm also going to need to do that USB method ? I'm interested in how well it would do. I thought about drop usbs but then I fell in paranoia. What if a cop takes your usb and you infect a police station? ?

#Skyline - July 9, 2015, 9:00 pm

Very helpful to users interested in spreading.

Armada - July 9, 2015, 9:00 pm

That would be awesome IMO. lol

Access ALL the Criminal Records!

Bo Burnham - July 9, 2015, 9:00 pm

Oh, shit!

I'll make sure not to name it "porn stash.exe" so then it won't be cop bait! ?

Niko - July 9, 2015, 9:38 pm

That comment gave me a really bad idea... I should try it :)

Bo Burnham - July 9, 2015, 9:40 pm

(Jul 9, 2015 09:38 PM)LegitBytes Wrote: [\[CITE\]](#) That comment gave me a really bad idea... I should try it :)
Lol xD

Hope whatever method you've got off of my comment gets you a lot of slaves ^_^

You earned my +1 for this tutorial kek.

Edit:

Response: Oh ffs ._.

vicky245 - July 9, 2015, 11:16 pm

Thanks dude.. Better than paid shit spreading guides...

Niko - July 10, 2015, 12:02 am

I know, eBooks are pretty much all just known methods done a bit differently.

MafiaServ - July 10, 2015, 12:02 am

Well elaborated guide. It's always a charm to see people helping this community, and for free.

I just couldn't get the pastebin part completely, but never mind, I will do a little research on that.

Job well done OP. Appreciated. ?

Niko - July 10, 2015, 12:11 am

The pastebin part, is basically,

Hey, this is xx_AnonymouseHax0r_xx (Or your name) and I am releasing this new minecraft (Some type of hacktool) and I'm looking for beta testers, you can download it at "your infected download".com. If you have any issues, please send the bug report to Fake@email.com

Oh, I was looking at it by a different angle. Got it now.

Thankyou for elaborating it mate. It was so nice of you. ?

vicen2010dj - July 10, 2015, 7:28 am

For me the best one is torrent spreading, it's f*cking awesome if you use it properly ^^

Niko - July 10, 2015, 7:54 am

I have always stayed away from torrent spreading, never got to get anything from it.

? **[\$(1000)\$] ?** - July 10, 2015, 9:50 am

LegitBytes is legit and knows what he is talking about.

He knows how to spread his RAT.

makko - July 10, 2015, 2:30 pm

Very nice tutorial man :)

IHasBrains - July 10, 2015, 5:41 pm

Good guide! Verry helpful!

toome - July 10, 2015, 8:30 pm

Thanks, I just wanted something like this.

VirtualMon3y - July 11, 2015, 12:23 am

Great guide thank you sir. I will be back to this tut and using out some of these ideas!

Love the USB idea if I have the balls to do it! Haha

Niko - July 11, 2015, 11:10 am

I'm glad to see you all like it!

Quote:Love the USB idea if I have the balls to do it! Haha

If anyone gets slaves with that, they are a true legend.

Devskirt27 - July 12, 2015, 2:52 am

A tip for spreading with USBs is to print off a company logo and stick to the outside and label it something like "confidential accounts information Q2 2015" make it as bait as possible before they plug it in to look :)

FreeYang - July 12, 2015, 5:53 am

Thanks for the methods. I'll defenitelyy try some of them :)

Niko - July 12, 2015, 5:15 pm

id rather just put them in strange as fuck places and see what kind of people find them.

or give them to homeless people and see where they end up.

Niko - July 13, 2015, 1:34 pm

Totally going to give this a shot with some old USB sticks I got kicking around next time I am downtown. That should be interesting.

LaFleurDeBamaco - July 13, 2015, 5:43 pm

Thanks sir for your guide , i willtry for sure some of them :)

Niko - July 14, 2015, 5:39 pm

(Jul 13, 2015 05:43 PM)LaFleurDeBamaco Wrote: [\[CITE\]](#) Thanks sir for your guide , i willtry for sure some of them :)

Good to see you show interest ?

Wolf of Wall Street - July 19, 2015, 10:55 pm

Im all over the usb one, what a great idea

Adderall - July 20, 2015, 3:35 am

Very nice USB trick never heard of this trick before probably because it will cost some money for the USBs and most people hate spending money (I do too), but I have some old USBs I don't use maybe I will give it a try.

?

ChickenKFC - July 20, 2015, 3:36 am

thanks for that tutorial, helped me alot!

Mr Reddington - August 7, 2015, 10:42 pm

Posting so can find again when needed. Thanks

LilHackers - August 7, 2015, 10:50 pm

Great guide mate, keep up the amazing work!
