What kind of plan do you need for this to work? I know a couple people on legacy/really old plans that haven't existed for a few years.

I have no clue what your talking about, as in plan I mean what you pay monthly.

E.g. 1400 Minute Family Talk and Text Plan, Unlimited Nationwide Talk & Text, the Unlimited Everything plan (talk, text, & data), etc.

If I have a family share plan and only one smartphone has 2gb data (billed as \$30 for 2gb for just one phone, this is long before the data sharing came along) does this work?

Example; I have the 1gb plan

Use all the data up then I refill it.

Simple, doesn't matter what plan you have just the amount of data your plan is.

Verizon is the only thing I tried, nobody else in my family has anything else for me to test different providers.

I don't think that will be possible, this service is to be used once you get the text message saying you used up all your data.

Unlimited data master race checking in! only text I've ever gotten is please reduce your data usage hahaha.

What is the going rate for a 2gb data plan anyway?

1 gb is \$10 according to verizon prices, so buying 2 gb from them would be \$20
