Just go through those links and there is a small question survey. You will then get a download link to a .txt with a verification code. Send me all three and you will be entered into the contest.

You can either be upgraded to L33t, Ub3r, or just receive the equivalent amount of money to the upgrade via PayPal. ?

Done. Spoke to you via PM.

Thank you again, you're very kind.

So if we do all 3 we get a upgrade automatically or we are put into a drawing with other people that completed?

You'll be entered into a drawing.

On a side note, if you're looking to get upgraded through a contest this would be your best bet.

Not many people will enter because they're lazy, and/or hate surveys.

If you enter another contest you're competing with 100+ people.

Enter this one, and you have a much better chance.

You get put into a drawing. I don't really think many people will be entering so in that case you will have a pretty good at winning.

There's no question surveys for certain countries.

I guess this would only work for US, for my country i would need to pay about 3\$ per survey.

You're surveys don't work, the file never completes.
