Thread: [How can I make some money with premium webhosting, \\$50 and plenty of time?](#)

XtremeCatalystXD - July 10, 2015, 4:23 am

I live in Australia (STRAYA C***), and I already have good quality Australian web hosting that I want to make the most off.

I have about \$55USD in my PayPal account from YouTube monetisation (if that's at all relevant) and I'm just looking to make some money, would prefer something with minimal effort, but if the reward is good enough I would be happy to spend a good 10hours/week on this.

Sorry if this is in the wrong section, admins please move it if it's the case.

Thanks for any replies !

Good money doesn't come from minimal effort. The best minimal effort you can make money from is working at McDonalds. Internet Marketing is truly hard and is only for the dedicated hard worker. That's why not many succeed. The trick is long/smart/hard work which no one is down to do. Every one wants quick and minimal effort money which does not exist. Unless you're talking like \$50 - \$100.
