[View Prices and Packages](#) Affordable web hosting services delivering performance, ease of use, and 24/7 expert support. Shared hosting starting at \$4.99/month

Hey guys So I've been using Geek Storage with out an issue for over 4 YEARS

Not only do they have awesome prices for the quality of service and support you get, but they go above and beyond in the support and service section.

I've had a month or two where my payment would have to be late, Let them know ahead of time and we worked out a new payment date and avoided canceling/ suspending my site for any time.

I've also never had an issue with downtime or other issues that would be on their fault.

So if you are looking for a Fast, Cheap but professional hosting service for any need, look No Farther then [Geek Storage](#).

Not sure what you are talking about? Stupid or just trolling cause no one wants to buy in your group but thanks for the bump sir

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley
