Thread: [{DarkComet} DDoS with DarkComet {DarkComet}](#)

Marijuana ▯ - July 13, 2015, 3:16 pm

Once you have put your RAT infection to public and start gaining Zombies is when this tutorial will come in handy.

First select all of your Zombies by selecting all of them in the "Users" tab. Once selected please right click anywhere on the Users page and select "Extra Broadcast Commands" then "DDoS Functions" now at this point you have options for what you are DDoSing, if you are aiming for a website hit "Http flood" but if you are aiming for a home network hit "Syn Flood". For an example I will be showing you how to use the Http flood, Once you have opened the http flood gui it will present you a box saying enter the "ip/dns:" in the box below it enter the ip/dns of your target and press "Ok". Next it will ask: "How much time (in seconds) 0 = Unlimited" now type how many seconds you want the flood to be active for (0 = UNLIMITED TIME). Hit OK, and, your done! You can also visit [downforeveryoneorjustme](#) to see if the Ip/dns you entered is down! Thanks!

WILL BE COMING OUT WITH DARK DDOSER TUTORIAL AS SOON AS I CAN AFFORD IT!

ze-slade - July 13, 2015, 3:18 pm

Not sure why anyone would ddos with such an unstable rat to be quite honest or hold enough bots or slaves on a unstable rat in the first place, but good tutorial op.

No problem, welcome to the forum and stay HQ. ?

Il Ryoka II™ - July 20, 2015, 6:35 pm

dark ddoser is not working at the moment for me. Either my firewall is blocking it somehow or the server is offline. after the login screen nothing opens.

Just a Fyi for OP.

gausho - July 21, 2015, 10:40 am

thanks you so much! this tutorial helped me alot

Saney - December 26, 2015, 10:03 am

Nice! I already knew how to attack with a botnet, but you will probably lose 50% of Your slaves when u do it.. Not recommended:)

MobSnipe - February 4, 2016, 4:18 pm

Nice Method CONner rilly cool

Essence - February 4, 2016, 5:02 pm

Is this considered a "botnet"?

Using slaves/victim computers to send an attack is basically what a botnet is so I mean.. :3

radicalxfrosty - February 21, 2017, 8:08 am

Thanks for this tutorial!

Crandall1022 - February 23, 2017, 4:41 am

Thanks, this will defiantly come in handy!

Wayachi - March 1, 2017, 6:48 am

Better alternatives for this but still, as a tutorial it was easy to follow, gj

chrispa - March 7, 2017, 11:01 pm

Thank bro. am learning by the day

2 year old thread mate. Why you don't check? For future reference, please look at the published date to avoid grave digging. Thank you & have a nice day ?

MackyNous - March 9, 2017, 11:51 am

Nice tutorial, I past the whole Darcomet thing a couple of years ago but I imagine that this can come in pretty handy.

If anyone is still using DarkComet then yes, otherwise I doubt it. Have a nice day. ?
