Thread: [Learn Hacking and help hacking website that have stolen money](#)

Gumpie - July 15, 2015, 7:14 am

Dear forum members,

Today I have already done a post to find someone who wants to learn to hack me one on one. For this, I want to pay that person.

What I want to learn,

1. Website hacking with databvase
2. RAT use from novice to pro

What is also important for me to find someone who can hack a site fee. It is a web site on a server in Ukraine who stole money from my paypal account.

I am new and still can not send pm. Please pm me your contact. I have skype, Jebbar / xmpp etc.

Thanks Gumpie
