Thread: [RazorCrypt v2 is not FUD](#)

Mini-Uzii - July 15, 2015, 12:47 pm

I have to buy a license and to crypt him is not FUD I would like to contact the seller but its site is down and I can not mp on this forum the limitation is too high.

[3/35]

¹³³⁷**7** - July 15, 2015, 2:29 pm

Try contacting Razor on skype ? he could help u

Cammy - July 15, 2015, 2:31 pm

Read the original post nerd
OP get 25 HQ posts then PM the seller

KingUnbound - July 15, 2015, 2:33 pm

do you have his skype? and just pm him if you dont

PirateSec - July 15, 2015, 2:35 pm

If you think that you will get a refund just because "it's not FUD" than good luck.

Joaquín "El Chapo" Guzmán - July 15, 2015, 3:01 pm

Yeah i was about to buy a license but nevermind now :/

ATTACKER05 - July 15, 2015, 3:19 pm

can i crypt pony with this crypter?????? need help

St?lk?r - July 15, 2015, 3:20 pm

You tried to use a fud icon :) Tried to change the assembly?

Linkin™ - July 15, 2015, 3:21 pm

It's not FUD because noobs like you scan this shit on virustotal, ruins it for eeverybody. So just fucking wait.

ATTACKER05 - July 15, 2015, 3:30 pm

can this crypter cure pony's madness for me?? always detected during runtime and fud during scantime

Mini-Uzii - July 15, 2015, 4:29 pm

Shut up when u know nothink i scan on refud.me

SourMan - July 15, 2015, 4:33 pm

I can double confirm, it is not fud right now, be patient till he releases an update and please do not scan on sites that distribute aka virustotal, use the in-build scanner, ITS THERE AND FREE, or use

refud.me.

Darksidedefox - July 15, 2015, 4:35 pm

We can't help with informations like you gave us. You must send us a scan (only scan on non distribute sites like refud.me, razorscanner...) and then you should contact Razor. But I think, that you will not a refund just because it's not FUD.

Mini-Uzii - July 15, 2015, 6:41 pm

i can't post link but i have to contact razor and he has to delete my license of 3 months to buy without reason today

PirateSec - July 15, 2015, 7:36 pm

Because you were bashing on his crypter with your shitty thread.

CodeBinary - July 15, 2015, 8:06 pm

3/35 is actually a lot better than I thought it be. Razor Crypter is HIGHLY oversold.

Mini-Uzii - July 15, 2015, 8:16 pm

(Jul 15, 2015 07:36 PM)PirateSec Wrote: [\[CITE\]](#) Because you were bashing on his crypter with your shitty thread.

I denounce the truth contrary to of other one

Remember you bought the lifetime package I think...

TONS of people buy the 1 month package which is EXTREMELY cheap and the crypter gets detected SOOO easy with SOOO many people using and then theres people scanning on virus total.

PirateSec - July 15, 2015, 10:54 pm

(Jul 15, 2015 08:16 PM)Mini-Uzii Wrote: [\[CITE\]](#) 35\$ for 3/35 you are a funny guy

Where is your common sense?

Why would it matter if you bought something for a higher price. It's still the same product.

Jetirk - July 15, 2015, 11:24 pm

Where do you find that crypter at anyway?

Mini-Uzii - July 16, 2015, 7:45 am

(Jul 15, 2015 11:24 PM)Jetirk Wrote: [\[CITE\]](#) Where do you find that crypter at anyway?
no where man You risk to be disappointed

??f?g? - July 16, 2015, 11:27 am

Lol stop cry 3/39 nothing. Check MinerCrypt if u want real 14/39...

network slapper - July 16, 2015, 2:56 pm

razorcrypt is not a good crypter, 6month ago i bought it and it was not FUD, and support told me just USE FUD ICON, this icon is same i use in another crypters and work perfect.

Linkin™ - July 16, 2015, 2:59 pm

(Jul 16, 2015 02:56 PM)network slapper Wrote: [\[CITE\]](#) razorcrypt is not a good crypter, 6month ago i bought it and it was not FUD, and support told me just USE FUD ICON, this icon is same i use in another crypters and work perfect.

This is completely false.

The reason why RazorCrypt isn't always FUD is because it is one of the largest crypters on HF, bought buy fuck loads of people. And they scan on virustotal, since it has a big playerbase it has loads of people distributing.

Mini-Uzii - July 19, 2015, 1:23 pm

Profess0r - July 23, 2015, 6:51 am

Before said : " Razor Crypt is not fud "

Please tell me

Do you know how crypt your files?
What do you try to crypt?

FriendlyHugs - August 2, 2015, 6:28 am

What do you try to crypt?

Yes to the first question and a LuminosityLink (RAT) .exe to the second.

DaPiranha - August 2, 2015, 6:32 am

Actually customer base doesn't really make a difference. If you are able to maintain FUD updates and keep your Crypter stable that is fine. Thing that makes a difference is when noobs upload there stub to distributing websites.

FriendlyHugs - August 2, 2015, 3:03 pm

(Aug 2, 2015 06:32 AM)DaPiranha Wrote: [\[CITE\]](#) Actually customer base doesn't really make a difference. If you are able to maintain FUD updates and keep your Crypter stable that is fine. Thing that makes a difference is when noobs upload there stub to distributing websites.

Either that or they spread it so convincingly that the receiver scans it.

valdez - March 24, 2016, 6:31 pm

I have the same problem, I build my server and then crypt the file.when i try to move the file from the

VPS to my real computer surprise the nod32 just remove the file saying like the virus it's an autoit (...) anybody sort out this kind of issue in order to can use it please.

Regards
