Just wanting to advertise a little bit and get a nice review from others.

This is a forum a couple of us put together. We have some custom coding in here as well as some custom plugins as well. We are a cracking/social engineering forum with upgrades as well.

Do you guys need any additional staff? Also, looks like a nice website. I like the theme. Looks promising, good luck with it. :)

Not currently no. And thanks for the compliment. The theme is customizable too for registered users.

Totally love the domain and the forum but I can't stand the theme. I've seen it on a lot of new forums lately. If I would be able to change my theme up to something different on Exploit Society I'd definitely stick around but the theme bugs me.

Best of luck to your site my friend :)
