Thread: [I've been Key Logged lol.](#)

Filthy Frank•??? ? - July 17, 2015, 6:54 am

Woke up this morning to 20mill missing from my RuneScape. I haven't entered my passwords anywhere else apart from the RS launcher sooooo someone's watching me, heh.

I downloaded that Farbar thingy thing and here are my results :(

FRST: <http://pastebin.com/AEuWvE9s>

Addition: <http://pastebin.com/RP4B6Exk>

RogueKiller: <http://pastebin.com/23VSiKk2>

I ran a few anti-virus crap before this, hopefully it's removed, but posting this just to double check

YungTrigz - July 17, 2015, 7:28 am

Doesn't mean it's a keylogger, some RATs have runescape stealer's, as for the farbar recovery tool wait for someone who knows what they're doing like flaremalware.

Alright, Download [MalwareBytes \(clickable link\)](#) and [Avast \(Clickable Link\)](#) Run a full scan hope it finds it.

Filthy Frank•??? ? - July 17, 2015, 7:43 am

Done Malwarebytes, removed whatever it found, doing a full system on Avast now but it's gunna take ages, only at 1% but I guess I'll wait haha

Also do NOT change your password until avast! is done scanning, he will just see the new one.

(Jul 17, 2015 07:43 AM)Filthy Frank•??? ? Wrote: [\[CITE\]](#) Done Malwarebytes, removed whatever it found, doing a full system on Avast now but it's gonna take ages, only at 1% but I guess I'll wait haha

Also do NOT change your password until avast! is done scanning, he will just see the new one.

If avast! finds nothing.

Download RogueKiller and save it.

Right-Click RogueKiller.exe and run it as admin.

Allow the Prescan to complete. Upon completion, a window will open. Click ACCEPT.

A browser window may open. Close the browser window.

Click SCAN and after scan is complete click REPORT

Close the program.

RKreport.txt will be open. Copy the log to pastebin.com, Submit it and paste the it in your reply.

Download [Farbar Recovery Scan Tool](#) and save it to your Desktop.

Right click to run as administrator (XP users click run after receipt of Windows Security Warning - Open File). When the tool opens click Yes to disclaimer.

Press Scan button.

It will produce a log called FRST.txt in the same directory the tool is run from.

Please copy and paste the log back here

The first time the tool is run it generates another log (Addition.txt - also located in the same directory as FRST.exe/FRST64.exe). Please also paste that along with the FRST.txt into your reply.

These are the basics, wait for a trained malware specialist to read your logs, and help guide you through the steps you make sure your PC is completely clean.

Scanned over it then started reading the other person's replies, sorry.

Wait 12 hours and if nobody responds I'll redirect you to a forum where you can get help.

I can take a look at your machine if you would like me to. I can do a remote support session and you can have full control of the machine at any time.

Slachter - July 17, 2015, 9:31 am

Remove those:

C:\Users\Scott\AppData\Local\Temp\jre-8u31-windows-au.exe
C:\Users\Scott\AppData\Local\Temp\nvSCPAPI.dll
C:\Users\Scott\AppData\Local\Temp\nvSCPAPI64.dll
C:\Users\Scott\AppData\Local\Temp\nvStInst.exe
C:\Users\Scott\AppData\Local\Temp\sfamcc00001.dll
C:\Users\Scott\AppData\Local\Temp\sfextra.dll
C:\Users\Scott\AppData\Local\Temp\Skin.dll
C:\Users\Scott\AppData\Local\Temp\SkypeSetup.exe
C:\Users\Scott\AppData\Local\Temp\SRLDetectionLibrary4910999296603301933.dll
C:\Users\Scott\AppData\Local\Temp\SynciosDeviceService.exe
C:\Users\Scott\AppData\Local\Temp\Uninstall.exe

.waste - July 17, 2015, 9:38 am

You should change your passwords from an uninfected device. You could also enable another form of authentication for Runescape, and I would recommend setting this up if possible.
