Thread: [Best High End Dedicated VPS Provider?](#)

Random - July 17, 2015, 3:18 pm

Looking for atleast 8 core/8g ram

Must have a good processor and speeds

Whats a good host?

Jim Crow - July 17, 2015, 3:49 pm

I am using these: <https://www.dreamhost.com/hosting/vps/> Maybe this is something for you since it offers SSD - But I don't have a lot of knowledge about servers :)

You could also give venja.co a try!

Fraud Detective - July 18, 2015, 5:46 am

If you can manage a server yourself try :

<https://billing.dacentec.com/hostbill/index.php?/cart/dedicated-servers/>

They have pretty decent dedicated servers. The price is small because they don't offer management. They will only answer to hardware problems tickets.

BITW - July 19, 2015, 12:11 pm

I would suggest you to go with <https://www.leaseweb.com/>

Best of luck.

FantaŠec - July 19, 2015, 12:13 pm

Take a look at <https://hostdark.com> PM me if you have any questions.

Gox. - July 19, 2015, 12:13 pm

I would definitely check out [DigitalOcean \(Quick link\)](#)!

They offer various locations too. Excellent service in my books!

Why wouldn't you just get a dedicated server if you need such high specs?
