Thread: [Visual Studio 2015 Release - Download Now](#)

Only3 - July 19, 2015, 6:04 pm

? Full (Not RC)

<https://www.visualstudio.com>

just install it and its AMAZING ! Must Have

Enjoy ?

+Haze - July 19, 2015, 6:07 pm

its not the 20th for me yet. u loose

Only3 - July 19, 2015, 6:10 pm

How do these things called "days" work then?

Vrekt - July 19, 2015, 6:48 pm

Man, I don't know if I want to switch to 2015 ?. I have used it before and its amazing, but I don't think I can abandon 2010 haha

Menalix - July 19, 2015, 6:56 pm

Wtf is this, just switched 2010 version out with 2013 7 days ago and finally got quite used to it today.... :(

(Jul 19, 2015 06:48 PM)Vrekt Wrote: [\[CITE\]](#) Man, I don't know if I want to switch to 2015 ?. I have used it before and its amazing, but I don't think I can abandon 2010 haha
Ye 2010 was the shit... It just seems much more light-weight than any of the newer.

I don't know how Microsoft managed to screw memory management up so much with these newer editions. When I made the switch on my old laptop it started lagging like crazy.

+Haze - July 19, 2015, 7:39 pm

I can even feel how slower it is on my desktop with i7-4770k, 32gb ram and 2x SSD in Raid0, I hate it.

I would go with sharpdevelop if it just could compile Any and x64 compiles...

- And those cool feautures is not something everybody use.

Not only low-spec pc's but also people who are performance critical and people loving heavy multi-tasking.

WhyWork - July 19, 2015, 7:51 pm

?. and \$ is the best thing ever

YES! I lag so bad its really annoying, I really do like the new features and I know my laptop can handle them but it still lags... I also don't like how the program is 11gb+ 2013 was 4gb..

Only3 - July 19, 2015, 8:49 pm

Adderall - July 20, 2015, 3:07 am

Too bad I can't try it out I am on vacation. It looks good, but you post that it will screw low spec PCs I hope my 8gb ram and Intel core i7 laptop could run it.

Sakawa - July 20, 2015, 3:40 am

lol. Are you joking?

btw, I have tried the RC. It looks very good (even if it doesn't run smoothly).

programtesting28 - July 20, 2015, 5:27 am

it is free ? thanks before :D

The-One - July 20, 2015, 5:29 am

Haha, Microsoft and their RC versions lol. I've been wondering the design is more VS2010ish right?

Meh, I'll just wait till the official release and grab a key from dreamspark, inb4 trial runs out.

?????? - July 20, 2015, 5:30 am

Thanks Only3.. I love VS 2015

He B TeMy - July 20, 2015, 7:14 am

Yeah, i feel the lag too sometimes, although VS allows you to disable alot of crap you may not use, but the resource hogging is too much it lags always.

Odus - July 20, 2015, 8:25 am

Me too. Only on first boot though, otherwise it's generally fine... Other than when Intellisense crashes. That's a bitch.

G???????f????s? - July 20, 2015, 8:26 am

Using 2013 and loving it. Might upgrade.

He B TeMy - July 20, 2015, 9:53 am

I'm installing it now... does it really install? The Enterprise version? Or it asks for payment after? Or it's a trial?

Am i good to go? <https://i.imgur.com/lKyPfwF.png>

ItzNotLuck - July 20, 2015, 9:58 am

Community is free. Enterprise is a 90 day trial buy 6k after that.

90 days? With full features? They're getting generous or what?

If yes, it's enough time for someone to cr*ck it.

ItzNotLuck - July 20, 2015, 10:59 am

I think Microsoft tool kit should work for it soon enough

They were probs hurting they did 90 day trial and free windows 10 like wut :o

He B TeMy - July 20, 2015, 11:42 am

Well, just installed 2015, updated resharper and integrated it with 2015, both 2013 ultimate and 2015 enterprise seem to take the same time loading though.

Although at the moment i've not encountered any 'lag'.

I'll give it one week in the open before i start porting all my apps to 2015 and ditching 2013, 10GB is too much ;(

Only3 - July 20, 2015, 11:50 am

just install it on the new computer have 2013 on the old so i dont worry

log dot zip - July 20, 2015, 1:06 pm

Yeah, for anyone who likes neat concise code, Visual Studio 2015 is definitely the way to go. I love the improvements they've made to the syntax in both VB.NET and C#.

IAmNotHere - July 21, 2015, 4:42 am

Community is not for me. Just not working for me. I like 2013 desktop. Thanks for opening this thread and have a good day Only3.

?

?

It feels the same for me. What don't you like about it?

SuperHuman - July 22, 2015, 3:39 pm

What is f#, is it a new language or something?

Only3 - July 22, 2015, 3:49 pm

what is google [https://en.wikipedia.org/wiki/F_Sharp_\(programming_language\)](https://en.wikipedia.org/wiki/F_Sharp_(programming_language))

And what didn't you like?

Uzi London ++ - July 26, 2015, 3:28 am

Awesome thanks. Probably would've been months before I updated if I wasn't skimming through this section ^^

SIM-1676753 - July 26, 2015, 3:33 am

(Jul 26, 2015 02:30 AM)IAmNotHere Wrote: [\[CITE\]](#) Because the F shortcuts had changed. And what didn't you like?

I liked pretty much everything about the update. Especially C# 6.0. :)

Arduous - July 26, 2015, 8:00 pm

It supports iOS? Meaning I don't have to buy a Mac to make iPhone apps now?

SIM-1676753 - July 26, 2015, 9:39 pm

I believe you have to install Xamarin and obtain a licence.
