Thread: [Combile RAT Client exe with Image or PDF?](#)

exqz - July 20, 2015, 10:52 am

Hello ?

Do you have any solutions, to combine a Client exe from a RAT like Babylon with any PDF Document or Image?

Some years ago I had a program to combine, but the name is gone..

Thanks a lot!

you talking about a binder?

if yes, there a tons of binder on hf use the button search

TerenceMcKenna - July 20, 2015, 11:12 am

I suggest purchasing cloud crypter.

You can attach your executable to a photo.

They run the .exe, and the photo will open.

It works flawlessly.

I purchased cloud crypter, but i cant create an image or pdf files. I used search here many times, but just found very expensive exploits. any cheap solution?

Armada - December 8, 2015, 7:38 am

You cant correctly bind to an image.

There are work.arounds, but anyone with 1/2 a brain will see through the attempt.

Next option is pdf or doc exploit. I know the pdf ones can be expensive but document exploits vary in price depending on your needs. Maybe look in to that instead dude.

excuse me, is it possible also to have the binding (after being crypted) be in another format than exe?

.exe

.com

.scr

And others will work as well.
