Thread: [I need a list of the top 5 - 10 most used RAT programs.](#)

unopie - July 20, 2015, 3:26 pm

Anybody want to help me compile this list? I know the obvious...

Njrat
Darkcomet
LuminosityLink

Post what you think is a very popular rat program.

Spoiler ([Click to View](#))

if you really want to know, I am doing this for a anti-malware project

?Syria - July 20, 2015, 3:45 pm

Dont call nanocore and IM3 malware they are not malware

bluedragon123 - July 20, 2015, 3:50 pm

i wouldnt even call nanocore a good rat anymore as they removed key features but this was owners choice to progress

the 3 you suggested are what i recommend and 2 of them are free

Niko - July 20, 2015, 3:55 pm

Njrat
Darkcomet
LuminosityLink
IM3
NanoCore (Fairly WhiteHat Though)
Babylon
OSCelestial
XtremeRat 3.5
X-Rat
CyberGate (Used to be popular)

?Syria - July 20, 2015, 3:56 pm

CyberGate (Used to be popular)
IM3 And NanoCore are not malware they are programs for educational purposes.

Biometric - July 20, 2015, 3:56 pm

All RAT's stickied in the RAT section are good in their own ways. But, as of right now avoid Babylon, because the auth system has been down for a week.

I'm assuming he wants to analyze the rats and look for characteristics or something. He wants rats, I gave him rats.
