I'd recommend vDos but you only have \$10. You should check out the [Server Stress Testing](#) section to find a good one in your budget range.

str3ssed.me, no complains at all

MR.Nitro - July 21, 2015, 2:24 am

masterstresser.com is great, hits hard and cheapest deal is \$5 for a month with 300 seconds, or \$7 for 600 and \$10 for 1200. Has 3 servers with 15+ attack methods, 24/7 support. add er-neva on skype and say mr.nitro sent you and he might give a discount :p

Also using masterstresser.com

Best stresser ever!

I gotta agree with the two people above me, masterstresser seems like what you should get. I got a friend who uses is as well.

SynStress has many good attack methods and packages, also Kryptonik is very cheap and provides high quality services.

THC - August 6, 2016, 11:20 pm

zl Storm lz - August 18, 2016, 4:12 pm

do u guys know any other site like ipstresser that u can hit a lot of people at once I want a stronger one

Popes. - August 19, 2016, 10:10 pm

There is alot of good stressers out there, but I would recommend Alpha Stresser although it is a little bit out of your budget range; it offers 24/7 uptime and customer service with decent GBPs power (depending on your subscription.) and unlimited boots per day. Defiantly worth the money in my opinion!
