Thread: [Scammed \\$40.5+ \(USD\) BTC by Game Freak | UID=1994813](#)

FiendFyre - July 21, 2015, 9:33 am

So I had a thread in the Secondary Sellers thread about selling a .edu creation method, that was original, and Game Freak (<https://hackforums.net/member.php?action=profile&uid=1994813>) asked for a vouch copy which I gave him. He had high rep, and I figured he was ok to trust. We then partnered up to sell the method, he would take 10%, and I would get 90% (since it was my method).

He created a thread, which he seems to have now deleted, and sold at least one copy, to ?DarkIllusion (<https://hackforums.net/member.php?action=profile&uid=2455005>), who posted a vouch in the thread.

One other copy was given to sportyloc107 (<https://hackforums.net/member.php?action=profile&uid=1122529>). This was apparently an actual vouch copy at least according to sportyloc107.

Game Freak claims that the copy he gave to Dark Illusion was a vouch copy, however, when I contacted DarkIllusion about this, it is clear that he/she actually purchased the method from Game Freak for \$45 BTC. Proof was provided by DarkIllusion here: <https://imgur.com/a/K1HE8>

I tried contacting him and he isn't responding to pm or skype. He has now deleted the sales thread as well, but I'm sure there's several people that remember what was going in there as well.

EDIT: I found this as well: <https://hackforums.net/showthread.php?tid=4913829>
Which seems sketchy considering that the method was selling for that amount.

Scam report looks legit but not very organised, I would advise you follow - Sam-'s template.

FiendFyre - July 22, 2015, 2:42 pm

Sorry about that, didn't realize there was a proper format! Updating it now!
Edit: Apparently I can't edit since it's been too long... I'll just post it here then.

Looks legit, good luck with getting this resolved!

I agree. I just wish HF mods would do something about it, like a ban or ip-ban.

sorry admins seldom act on deal disputes but I'm pretty sure they normally check around on the section

I understand that, I just meant that while they aren't responsible for getting money back if something goes wrong, they could, at the very least, ban the member so they can't do it again. TBN (thebot.net) does that.
