Will this bypass Symantec Enterprise AV? Which is what many schools and companies provide for their computers.

Will this bypass government, military, big companies AV's (whatever they use)
(The second line is just hypotechical :D)

will you provide updates if it goes non FUD? (just making sure)

We do not allow you to infect Gouvernement or any Official places, using our crypter.

Nex, can you send me a PM? I'm below the post level on this forum to message you.

refud shows 0/35, but when I put my "crypted" stub on the remote machine it's auto detected by my AV (BitDefender). Furthermore, when I run the stub against a different AV site, fuckingscanme, it shows 7/29 hits. Ran through a scantime that I know works to see if runtime on the crypter was working, but no dice, also detected. I have result links but cannot post here because I'm still a

low-post user on these forums. Any help is appreciated. Feel free to add me on skype to troubleshoot, my username is: th3magpi3

I wasted a lot of Money and bought 5 different crypters. Debug Crypt-er is the best crypt-er on HF. Its updated regular y and its almost always FUD. Some other Crypters look very fancy with artwork graphics but are poor in crypting.
Most the time only Foritclient Antivirus its giving a hit on scan4foryou.
1/35 is very good i think.

Debug crypter is one of a kind, we also arent slammed with a lot users making your file stay FUD for longer periods of time. We update our stub the day a detection happens to ensure our customers have FUD servers.

Hey I'm getting 8/35 reports.

I'm doing anything wrong here?

Sorry it's the first time I'm using a service like this.

i dont have file,.....i need file result configured to my email or panel plus 1month crypter ,.....tell me price[/font]

HappyCEO - February 2, 2016, 4:49 am

Hey, i have sent you a PM, i am having problem with crypting, :) please ansvere when u can:)

icek77 - February 2, 2016, 7:58 am

crypter worked 15 days !! I bought a license for 30 days, unfortunately I did not get a refund

Momo120 - February 2, 2016, 8:22 am

Still getting 8 reports by common AVs.

Even crypting other applications is giving me the same result.

HappyCEO - February 2, 2016, 11:18 am

happend to me also on the other crypter i have, i just tried this one, and now i miss 2 days because im not getting ansvere in pm for my problem. :/

Nex+ - February 2, 2016, 11:49 am

I messaged everyone who messaged me. Posting on this thread will result in being ignored.

Be aware you're being ignored ?

AnonyKidz - February 3, 2016, 10:32 pm

I would not recommend buying. This is a major let down and does not work well. I got 24/54 and that I was banned for scanning it under virustotal? LOL???
