Thread: [\[KIK\] New Method To Find Kik Traffic - My Android App](#)

itsamazingafterlife - July 22, 2015, 12:29 pm

I am a new developer and constantly looking for innovative ideas to start working on making an app. So when I found it I didn't waste time making one

The IDEA

So I was shuffling through pages of Android Communication apps on facebook like snapchat and kik and found a similarity in the comments of their posts, people used to comment their usernames on these posts, It rang a bell in my mind and I am thinking that alright so these people want to chat and they don't have a platform to share their usernames and connect with people having similar interests.

So I started coding.

The APP

I tried to code it from scratch and as close to material design as I can without compromising on compatibility with legacy and older android version devices. Works on android 2.3.3+ Gingerbread and above

Description

Socialize is the best place to share your social usernames like Kik, Snapchat and Whatsapp. Connect with people having similar interests.

Wanna know who is interested in photography and wants to chat? you can get the usernames of those interested people and share photography tips! or maybe some recipes of cooking! or you just want to chat randomly! You can get unlimited entertainment. Plus we provide support and accept feature requests. If you want any feature or discover a bug we are committed in fixing them as soon as possible.

???Features:???

-- Submit your social username (kik, snapchat, whatsapp, website)

-- View profiles with similar interests

-- Automatically copy usernames to clipboard

--Automatically open related app after copying

-- Over 500+ profiles already added !!

-- You can date your partner without the hassle of a third party app.

-- More usernames will be added daily

For support/bugs/feature requests please contact koochiekooinc@gmail.com or reply to this thread. I am very eager to know what you thing about this Also if you like the ideas please rate my app on playstore so I get some attention

How I Monetize? I have implemented pollfish surveys in my app! So if you use the app and find a survey please answer those as it will help my my hard work

Download:

play.google.com/store/apps/details?id=com.koochiekoo.socialize2

Remove Spaces Between dots " . " from the link above

I am open to any questions, criticism, feedback, feature requests, appraisals, comments, etc.

Please feel free to write them below

Please share this app as much as you can with your friends.

Thankyou

Has anyone tested this stuff, yet?

DaisyOdland - July 22, 2015, 12:42 pm

Are you going to allow us to put sexual tinted bio's for e-whoring? lol

It looks good though, probably just needs traffic right now.

I'll install it on my bluestacks right now and take a look

Edits:

OP, are you trying to destroy people's eyes with that red/yellow authentication box?

Buglist:

1. When creating your profile there is no text on your confirm button.

The purple one to submit your profile, is just... purple, no text.

2. Pictures don't upload when trying to upload in submit your profile.

3. After submitting the profile, there is still the "submit profile" choice in the menu where i'd expect "edit profile".

Also your profile is posted at the bottom rather than at the top what you would expect with a new profile.

Tip: If you want to work the way you are in displaying the profiles you should give people the option to push there profile to the top after some time or add search options.
