Team Sinister

Team Sinister is a new Doxing/Hacking/DDoSing team. We work for multiple goals. Keeping the internet clean of scammers, and overall people who we dont like. We can take down websites, gaming servers, and more. We are looking for people that are ATLEAST semi-Experienced in SQLi, cross-site-scripting, anonymity, and DDoS. Preferably people that have decent knowledge, and a decent booter. We have a skype group call to communicate set up.

Send this application to the Skype below.

I'm not trying to get on him like everyone else but I feel like he read up on those things and decided that's what he wanted to do. Though trying to start a group isn't going to work out.

I'm just saying he joined 3 days ago and already is asking about people making a hacking team. If he is for real then good for him, But I think it is going to be one of those Skype groups that dies in less than a week.
