THE ULTIMATE FACEBOOK EMAIL PULLING GUIDE

[img]http://s17.postimg.org/ngibza01b/Divider.jpg[/img]

PROLOGUE

Before we start I'd just like to say that this used to be in the VIP section before it was removed, so I decided I would post it publicly for everyone...and for those of you who were unable to understand what exactly I was trying to convey from the thread title: This is a legit method that shows you how to find any friend's email that they used to logon to their Facebook with. This is a foolproof method and works with any Facebook account as long as you are friends with the victim at the time that you pull their email. So let the games begin...

[img]http://s17.postimg.org/ngibza01b/Divider.jpg[/img]

TUTORIAL:

Step #1: Making a yahoo email.

So for this method you will in fact need a yahoo email address. If you are too fatigued to navigate to yahoo's specific page to create an account, I have housed the link [here](#). Note: when creating an account you will need to confirm your account via a mobile device. Once you have created your account: login, and you should be redirected to this screen below.

Spoiler ([Click to View](#))

[img]http://s10.postimg.org/6uyft13s9/image.jpg[/img]

Step #2: Preparing to pull emails.

Now navigate up to the top where it says "Mail", with a purple envelope next to it. Click it, and it should take you to your inbox. Once in your inbox, go to the top left and hit the "contacts" tab. It will look like this:

Spoiler ([Click to View](#))

[img]http://s27.postimg.org/wnxr0t86r/image.jpg[/img]

Step #3: Succeeding!

So once you have done all this, it comes to the easy part. Towards the middle of your screen you should see a main form where it asks you various ways to import contacts... (Yes you guessed it!) You click on "Import New" directly to the right of the facebook icon, as shown below:

Spoiler ([Click to View](#))

[img]http://s8.postimg.org/esldfwb51/image.jpg[/img]

As you proceed to do this, a facebook pop-up will appear; asking you to login. Obviously you login. And wallah! All of your friends on your Facebook friends list will appear in your contacts. And the email they use to login will be displayed right under their name, like the image shown below:

Spoiler ([Click to View](#))

[img]http://s12.postimg.org/yebcqtztp/image.jpg[/img]

I bleeped out their emails/last names for privacy reasons.

[img]http://s17.postimg.org/ngibza01b/Divider.jpg[/img]

Pro's & Con's:

PRO'S: This method very useful when it comes to...Doxing! This can be a crucial part to building a dox against someone.

Brute-forcing. This can be very helpful when testing a login, and needing their email.

Just simply needing to contact someone.

Possibly harassing them with junk mail.

Signing them up for news ads or magazines.

CON'S: This method can have some flaws when...Sometimes if the person didn't sign up with an email, you won't be able to pull one (Obviously).

If the person signs in with a phone number, you can't get their email either.

This method is less effective than holding someone at gunpoint, asking for their email.

[img]http://s17.postimg.org/ngibza01b/Divider.jpg[/img]

EPOLOGUE

Honestly I would say, the pro's outweigh the con's in this situation. Just be sure to use responsibly, and if there is anything you are unclear about, please contact me via PM or Post, and I will incorporate it into this tutorial. Thanks for reading. ? ? ? ?

Very good tutorial. I happened to know this, and I can say it's quite useful. If your victim tends to add whoever on Facebook, you can easily get their email by doing this.

Yes. I also think I have found a way to get their phone number they login with, in case they didn't register with an email. I hope to have this up by the end of this week. Still needs some more testing.

MRMazzaMan - February 14, 2016, 4:32 am

This might be a little bit of a n00b question but how does revealing the phone number have any affect on gaining access to one's account? I'm trying to figure out someone's email but when I type in the user ID to forgot password there is an email there, I just can't pull it on yahoo.. any ideas?

Also very nice tutorial, nicely laid out, easy to follow

falcon F - February 18, 2016, 12:29 pm

thxso much mate this is really helpful but isnt there any other way that i can know the email address of somone not in ma contact list on fb??

jimmyfer - February 23, 2016, 11:47 pm

This is gold, thanks. We can even make a email list adding facebook people with a fake perfil from diferent pages with a single niche. :D

DonD - February 24, 2016, 4:01 pm

Great tutorial, I know for a fact that this used to work, Ive tested it myself..

Sadly I still havent figured out how to get the mail from people not on your friend list, anyone knows a way? :)

ExcelLent10 - February 25, 2016, 7:09 am

well this is nice but i have an old phone that i can see email from all my fb friendlist ... idk how but this old phone is awesome :D (old android)
