Thread: [\[HoT\]Hack Facebook Accounts\[HoT\]](#)

Doodle420 - July 23, 2015, 10:02 am

If there's any kind of thread like this , delete this one. Step 1: Log in to your facebook account , go to (Account settings) and at the first page you have "Download a Copy"

Then Archive it

You'll receive the facebook copy in your EMAIL.
After you download it , go to "HTML" Folder

And down there you have friends.html , open it and you should see some of your friend's emails.

Then go to hotmail and sign up with the emails but some of them are already registered.

So if you have luck you can hack the account!

This tutorial is translated by me and made by me and some of my Albanian friends :)

Enjoy

Powerchaser - July 23, 2015, 10:04 am

I'm pretty sure all of the emails on the list will be already registered because not many people sign up to Facebook with an unregistered email.

You're right , but some make mistakes and doesn't open an email account I was able to catch 30+ facebook accounts with this method

Fair enough, well good on you.

NastyVirus - July 23, 2015, 1:47 pm

Might not work but either way it's cool to know this method thanks for the share you can do much more with just a simple E mail.

OG-SB - July 23, 2015, 2:04 pm

lol, all e-mails are registered 80%

Kokainee - July 23, 2015, 2:27 pm

Nice post, I'll try it later

Thehackerguy1 - July 23, 2015, 2:30 pm

1- This method rarely works and sometimes may not even work.

This method has an efficiency of 30% of getting the Facebook accounts and it's still a better method than "Downloading a fake facebook hacker tool and get rekt by keyloggers" it won't cost anything to try it and see your luck

TheNakedEmperor - *July 24, 2015, 1:57 pm*

I can further explain why this COULD work

@ 2007 Hotmail deleted all their inactive accounts
that allows you to open an account using a username that was once taken

that means that if @ 2006 i signed up as thenakedemperor@hotmail.com and wasn't active tho
signed up to facebook

I could now open an account @ hotmail with the same username and ask facebook for a password
reset.

I'd also like to refer you to a tutorial that allows you to see your friend's email via facebook:
<https://hackforums.net/showthread.php?tid=4918691>

enjoy guys
