Thread: [Looking for a mmorpg co-admin](#)

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 1:03 pm

I have setup the games servers from scratch source code..

This is a mmorpg and requires NO download and works on EVERY device..
Android/ios/linux/unix/windows/xbox/playstation everything.

<http://ogworlds.noip.me>

Its in pure alpha beta stage..

I will be adding it to the google play app store once I get the game more edited..

I have a very nice map/npc/mob editor for the game that makes this easy but it does require linux & python in order to bind the edits into the games server...

I am looking for a co-administrator for this game..

Requirments --

Code Must know and understand java and some python a good deal

Have some good understanding of map/tile/pixel editing

Be online 20hr ± a week

And have good team working skills

You can and will earn a income for this once the game has been developed to a stage of app release..

I intend to add upgraded member only items and areas and etc..

If interested in this pm me or post back here..

I will only be accepting one co-admin for this.. And if you can show example java projects thats a ±

This thread will close once co-admin is found thanks.

Jhené Aiko - July 24, 2015, 1:37 pm

Graphics are like gameboy pokemon lmao

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 1:52 pm

Yes this is because the game requires 0 addons plugins or downloads it works on anything that has a browser..

Not even adobe flash player is needed.

Fudster - July 24, 2015, 2:17 pm

Yep. Right here <https://github.com/mozilla/BrowserQuest>

Yeah try installing your own python server for it from source on a windows system.

And then have all the tools you need to easily edit the map/npc/quest/mobs and a database manager to set and manage accounts.

EWWWW windows...I use Linux servers

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 2:31 pm

Lol i do too most of the time.. I code in linux and windows and have made tons of android/ios apps which is also just a unix kernel.

YourNotMyDad - July 24, 2015, 3:00 pm

To be honest I like the way this looks but, I have no experience with coding. I might not be a big help, I would like to see this game go far and reach its full potential. Thanks for making this game, If you like I could be a moderator I guess... :P

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 3:04 pm

Thanks

I still am going through edits on the games database and its core functions. But I can give you char any wep,arm,xp you want.

Until then I cant really do much for you until I code a better inventory system or gold database function..

There really couldnt even be a mod yet as its not part of the game.. There is no built in function or command you could do or issue that gives you power over anyone else in the game.

!Soul - July 24, 2015, 7:14 pm

Meh, not applying, but the game's pretty nice. I'm enjoying playing the game right now.

Name's "Soul" in the game :P No one else is on right now which sucks, but yeah. I don't think we can chat anyway. It seems a bit laggy though, not sure if it's just me or right now.

Is the cave guarded by the golems just a loophole?

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 7:20 pm

Yes there is chat but i will be updating it to work better soon..

Yeah not many users are online its still all beta stage..

I thank you for playing though and everyone else.

I will be sure to keep everyones xp and items earned when we do add more updates..

!Soul - July 24, 2015, 7:29 pm

You should add a chat log on the side or something. What's said disappears forever into the abyss, haha. I encountered a person earlier n stuff.

I'm up to plate armor and magic sword! Wooo

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 7:34 pm

Yes this is one of the chat updates I will be adding

Also lots more maps/nps/quest and inventory slots.

!Soul - July 24, 2015, 7:38 pm

Well, I killed the boss. Is there anything else for me to do or have I beat the game?

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 7:43 pm

Pretty much you have probably went through what is only there as of now..

I mean you will continue to earn xp points but other than that not much else

I am working on coding functions into the java files of the game that will allow better xp logging chatting and inventory/shop data. Quest and so on..

Its just not a very fast task for me to do.. Hints this thread.

You will of you keep playing continue to earn your xp points I will be sure of this.

!Soul - July 24, 2015, 7:45 pm

I'm not sure if this is a bug but when I was with another player, the player count didn't go up. It might be stuck at one.

(i)(c)(u)(r)(u)(o)(k) - July 24, 2015, 9:53 pm

Ok we now have two active map mods so the map of the game will be edited on very soon..

I am now just looking for one more user that might be interested in helping with the games core code.

We need a user who is skilled in java programming and understands database entries and functions through it.

You along with the map editors will earn income % of what ever the game makes after so many edits are complete.

I must say, I love the idea.

Is there anything a non-coder could do for you? Might be fun to kill some time with this.

Thanks for playing, And I sent you a pm about this.

InternetG - July 25, 2015, 4:38 pm

Wow its really nice done, I really like that it works on every device without downloads.

Respect man real nice.
