BotMarket - July 24, 2015, 6:37 pm

Free for any admin/staff/mod member

Want to make a living online? Want to quit your job and work from the comfort of your home?

This is a never seen before method created by me. So easy a 9 year old can do it. Very little daily work. 1 Hour can get up to \$40. The more you put into it the more your make simple as that. This also now comes with some bots to help you out. Do not buy this if you are lazy if you want to make money you need to put in hours of work everyday.

Buy it now:

\$14.99 (Sold Out)

\$24.99 (Sold Out)

\$49.99 (Available Limited Time Only)

Price will be \$89.99 soon! Buy before the price goes up!

(Jul 25, 2015 05:43 AM)Purities Wrote: [\[CITE\]](#) I was given a vouch copy, and I'm here to give an honest review

Botmarket sent me the ebook via email, and as soon as I got it I opened it and read it. This is probably one of the most simplest methods I have seen out there. It's honestly not hard at all and even 13 year olds could do this and make at least \$50 a day.

This ebook is also original as I have not seen it anywhere else. It is also unsaturated as no one is doing it based on my research.

The ebook design isn't amazing, but it does not need to be. There is literally only like 5 steps, and then you're ready to go. No investment is needed at all.

Overall, this ebook is a steal for 14.99 and I'm positive you can make back the money in a couple hours. I'm personally gonna give this method a shot now, and I will post my earnings later on today:)

I got one word for this, and it's WOW! This is the second ebook I ever bought, and I gotta say the first one sucked. The only reason why I bought this is because I've seen BotMarket around and from what I've seen of him, his ebooks/programs are extremely well vouched so I thought I'd give this a try. And from just 1 days of using this I already got \$32 on my account which was extremely simple earned (prob spent 1-2 hours).

Sorry man it was only cheap to get buyers vouches.... the method + software + support is worth a lot more then even its current price of \$89.99

Riddick - August 20, 2015, 1:10 am

I haven't tried the method fully yet, however the support you receive from BotMarket is exceptional. I've just tried the software that comes with this and it's - excuse my language - fucking awesome. I will post back with proof of earnings when I can. So far this looks really good.

Just bought this package, even while im everyting but an ebook buyer, but since i know botmarkets reputation, and i saw his bot productions, i decided to give this a try. So far.. im amazed, it looks really promising, setting this up right now, i definitely see this making a EASY 2k per month. Im going to set this up now, and i will keep you updated about my earnings! Also i want to mention, so far, the service is very good, every question i had whas explained in full details. Thanks botmarket!

Due to the lack of sales at \$89.99 i have changed the price back to \$49.99. I guess i need more buyers vouches.... People have been ripped off so many times ebooks/methods have a bad name and i get it.

What is different is look at other sellers threads its all "Vouch for this user" normally not one real buyers reviews.....

Not calling any other seller out.....

But for real you guys need to start researching members before buying off them.

Go to the members rep. Then click the "Neutral" Read what people said.

Go to the members rep. Then click the "Negative" Read what people said.

Now go to the users profile and get his UID

Will look like this:

<https://hackforums.net/member.php?action=profile&uid=1709393>

You need to take the: 1709393

And go to the search:

Well, tbh, I get rip more times than I can remember.

But Bro, does it need any kind of software running and does it work worldwide? I'm from Asia?

What is the system requirement to run the software?

Can run in vm?

Thank you, any more info would be appreciated.

XzoRcisT - August 24, 2015, 1:36 pm

Is this software mac compatible?

..and how do you cash out/receive payment?

Yes, the method now comes with software to help you do the method.

You must have windows.

I guess you can run it in VM if you want too.

As usual, what min OS and dotnet requirement?

I'm using windows xp sp2 and dotnet 4.

I have a vm with windows xp sp3 and dotnet 4.

So which one can work?

And what other stuff/requirement I need?

And can autopilot while I sleep?

I would say xp can work long as you have like 2+GB of RAM.

You could do some of the work while you sleep but its not a full autopilot method.

As for human at computer(yea you told me its not fully autopilot), how much time do I have to personally use the computer daily doing stuff?

Any knowlededge require beside know to use internet??

Any extra investment needed beside purchasing the method?

Thank you.
