Sleeping With Sirens - July 24, 2015, 8:50 pm

[Video: https://www.youtube.com/watch?v=EnAdy_wvxMo]

Just here to offer my help to anyone who may need it, helping people makes me happy, and in return makes your life easier / makes you happy.

I'll answer any general question about HTML, CSS, PHP (inc. PDO), (some) JS, VB, C#, and Swift.

I'll help you to the best of my ability and will help you remotely over Team Viewer if you wish, I want nothing in return.

Ask away!

lenaos - July 24, 2015, 8:51 pm

This user is very skilled, nice help desk.

how to use php mail function with Localhost in wamp server? tell me bro

Sleeping With Sirens - July 24, 2015, 9:15 pm

(Jul 24, 2015 09:07 PM)SREE Wrote: [\[CITE\]](#) how to use php mail function with Localhost in wamp server? tell me bro

Kind of pointless, you can just use a mail service until you upgrade to an actual server, which I can do for you as well. (I'd still recommend using a trusted email service like the ones listed below).

A few PHP mail services instead of the mail() function are:

<http://www.toolheap.com/test-mail-server-tool/>

<http://phpmailer.worxware.com/>

<https://cloud.google.com/appengine/docs/php/mail/>

+Haze - July 25, 2015, 8:06 pm

How do I hack Google with programming skills. Answer my question kthnx

Open CMD and type "ping www.google.com" and it will give you root access to their servers.

Vouch. This is going to make Google very unhappy.

ModernMoney - July 26, 2015, 6:58 pm

I can never stick to one language, and am constantly juggling between languages, without getting very good at one. I keep finding good reasons to switch

That's fine to do, just don't completely drop one language after you start it.

It's fine to use multiple languages, just never drop ones just because you start using another.

Then don't, keep refreshing yourself with it with little projects.

I know: HTML, CSS, PHP, JS, VB, C#, Swift, ObjC, C and C++ and I refresh my knowledge in them at least every 3 weeks by creating a project in one of them.

Do you seriously create 8 or so projects every 3 weeks just so you don't forget these languages?

Sleeping With Sirens - July 28, 2015, 5:43 pm

Yes, not large projects, just stuff that keeps me refreshed in them.

Could be a calculator, social media website, cloud application, etc.

Sleeping With Sirens - July 30, 2015, 2:43 pm

I'm still assisting members if they need this!

Sleeping With Sirens - August 1, 2015, 12:14 pm

I'm still offering my help to all users.
