Thread: [Avatar Directory](#)

Allison Argent - July 25, 2015, 3:44 am

Hello,

I was wondering if for a suggestion (yes this might not seem needed at all, yet I thought I'd ask, for statistical purposes) we could have a area in which would collect data for users avatars; made by users of HF.

This would collect information such as:

- Users Currently Using The Avatar (Drop Down Option)
- Usage Of The Avatar (Selected Time Period)
- HF Profile Linking to Creator of Avatar (If they want a customized Avatar Themselves)
- Comparison with other HF Avatars
- Rating Of The Avatars (this would give the creator feedback on improvements or if they like the current style; this won't edit post-counts).

What do you think?

Thanks for your time reading ?

Eh useless. Omni has also said in the past he doesn't want to make useless queries (Of course not in this wording, but that's what he means)

Great idea.

1. It's original.
2. It's possible to implement.
3. Would highlight member created avatars.
4. Would encourage more user created avatars.
5. Could be a great plugin.

Honestly like the idea a lot. Award granted.

Hit me up in 2-3 months about this thread to remind me. I'd like to keep this on my todo list but it's obviously not high priority.
