His designs are really on a professional level...

Even though SL doesn't know me, I've been keeping a track of his past art through Rate My Graphics and his Behance and I love it!

I am usually a guy who goes around the Graphics Marketing dissing everyone throwing shade on GFX as an art form because of their LQ work being a reflection and standard set for the whole Marketplace.

But this guy, he knows what he is doing and will deliver actual HQ work with actual custom art, no more downloaded stocks and embarrassing situations of finding your logo online with just a simple reverse search.

But this guy, he knows what he is doing and will deliver actual HQ work with actual custom art, no more downloaded stocks and embarrassing situations of finding your logo online with just a simple reverse search.

Wow man, I am reading this with a tear forming in my eye. :D

I am really pleased that someone notices and appreciates my work and passion, and I will always give my best to keep improving.

Thanks so much, I really, really appreciate it!

Yes. Everything I do is 100% Custom, I am not using pre-made vector templates.

Also, yeah, I drew that all by myself.
