Thread: [Firefox Theme \[10 controls - VB / C#\] \[Update 29/07 \(2\)\]](#)

Naywyn - July 25, 2015, 10:33 am

Hello HF, SharpSource requested someone to create a firefox settings theme, so I made it. Here is my new theme : Firefox. There are properties to turn checkboxes texts to bold, and to disable controls. Credits are in the pastebin link.

It's one of my biggest theme. [Request thread](#)

Updates

29/07 (2)

Textboxes may be correctly disabled in designer.

FirefoxNumericUpDown control has been added.

NumericUpDown can be disabled.

Textboxes forecolor is now updated when disabled.

29/07 (1)

Pens and brushes are now disposed.

TabControl text drawing is now aligned.

TabControl is now supporting images.

FirefoxH1 is now inheriting of Label.

High quality drawing on FirefoxMainTabControl.

Radiobuttons can't be unchecked.

When a Radiobutton is checked, the other one in the parent are automatically unchecked.

Preview

ImageList TabControl

- Add an ImageList from the toolbox to your projet.
- Add all images that you want in ImageList.
- Click on your FirefoxMainTabControl, and link your ImageList to it.
- Go in the wanted tabpage properties.
- Modify the ImageIndex property.
- Profit.

This is the website I'm using in the preview of the theme : <http://www.iconsdb.com/>

Download the images in 32x32px.

Custom color : D6D6D6.

WhyWork - July 25, 2015, 10:36 am

Beautiful! It looks amazing! I'll take a crack at justifying the text and adding icons :). Great job Aero!

LilDurk - July 25, 2015, 11:27 am

This looks great, I'm definatly using this for my next program.

Thanks for the great release, keep it up :)

Geekie - July 25, 2015, 11:53 am

It looks good, Real close to the real image. Keep up the good work

Hawk HF - July 25, 2015, 12:30 pm

Excellent. Your work is always improving.

The visual quality of your themes are excellent, but I think you should take some time to work on your code.

From what I can see, your Helpers module consists mostly of snippets from other users here, including me. I see it in your controls as well. I appreciate that you're giving credits, but I honestly believe you're at the point in GDI where you should be able to code your own methods and functions.

I noticed a few things that you might want to fix:

Your Helpers.RoundRect() method is long and messy, it could be greatly improved by using a GraphicsPath

Declarations inside the paint event are a bad habit. Basically, every time you paint your control, you're redeclaring those objects. Place your declarations in the class scope and assign their values where you need them.

Dispose of any objects that implement IDisposable, such as fonts, brushes, and pens. Disposing of these objects will save you some RAM.

I noticed you had two separate controls for your headers. One inherits from Control while the other inherits from Label. Inheriting from Label is probably your best option here. I don't think you really need two separate controls.

I see you've made an extra property called Enable in your controls. A better option would be to overload the Enabled property. This way you don't have two very similar properties.

In your tab control, you're setting the backcolor of your tabs in the OnPaint() event. This is processor intensive. Use the OnControlAdded() method instead.

These are just a few things I found while skimming through your source.
Hopefully you take some time to improve upon some of these areas.

Good work and keep it up!

+Haze - July 25, 2015, 12:32 pm

Theme looks nice. I'd defo implement

MrHacker.Pcsq - July 25, 2015, 12:33 pm

Il est vraiment magnifique ton thème !!
Je le mets dans ma galerie à thèmes lol

Konstantinos - July 25, 2015, 12:39 pm

Damn that looks sexy !!!!

SIM-1847363 - July 25, 2015, 1:26 pm

Looks nice, you did a pretty good job. 10/10 would fk. Love the horizontal tabcontrol

Naywyn - July 25, 2015, 2:21 pm

Good work and keep it up!

Thanks mate for all these advices, indeed, I'll try to work more on my code. As for the "roundrect" function I'll need to learn how to use graphic paths. Otherwise, I'm glad you like it. :)

Delirium™ - July 25, 2015, 4:32 pm

This is fucking awesome. I love it!

clyy - July 25, 2015, 5:59 pm

looks very nice :) more pls :)

SaketSaket - July 26, 2015, 2:11 am

Awesome theme buddy... ;) Keep coding & keep sharing ;)

Adderall - July 26, 2015, 4:40 am

Nice theme thanks for sharing,
keep making nice themes ?.

iLogic™ - July 26, 2015, 8:00 am

Great theme man ? Thanks for share

Naywyn - July 27, 2015, 10:37 am

I updated the main post to fix my code, I re-created my Helpers module, created my own CenterString function but I have some problems with it in tab controls, so I also used the old one, and I did more...

hunters - July 28, 2015, 3:02 am

awesome one. i really like this theme. thank you for share with us.

Earn - July 28, 2015, 3:25 am

This is a nice looking theme, however, I just looked through the code & there is quite a bit of unnecessary code.

SIM-1676753 - July 28, 2015, 3:34 am

(Jul 28, 2015 03:25 AM)Earn Wrote: [\[CITE\]](#) This is a nice looking theme, however, I just looked through the code & there is quite a bit of unnecessary code.

I could only imagine how much memory is being used up.

Naywyn - July 28, 2015, 5:04 am

(Jul 28, 2015 03:34 AM)Mr. Trvp Wrote: [\[CITE\]](#) I could only imagine how much memory is being used

up.

Well, I fixed my code in the last update, so it should be using less memory.

raider101 - July 28, 2015, 8:25 am

You can't change the background color of the checkbox? Anyway to do it?

hunters - July 28, 2015, 8:53 am

very very nice work. that will be more awesome. make new controls like > groupbox, progressbar, combobox etc.

Thank you for your hard work.

Odus - July 28, 2015, 9:07 am

(Jul 28, 2015 08:25 AM)raider101 Wrote: [\[CITE\]](#) You can't change the background color of the checkbox? Anyway to do it?

Change G.Clear's color arg on line 326.

raider101 - July 28, 2015, 9:34 am

(Jul 28, 2015 09:07 AM)Odus Wrote: [\[CITE\]](#) Change G.Clear's color arg on line 326.

Thanks, I was searching for 256, 256, 256 for some reason, and not white itself lol

hunters - July 28, 2015, 10:39 am

please help..

FirefoxButton1.Click handler is not working. when i put some codes in this sub

Code Private Sub FirefoxButton1_Click(sender As Object, e As EventArgs) Handles
FirefoxButton1.Click

On Error Resume Next

MsgBox("clicked")

End Sub

nothing happens. maybe handler not working. please tell me how to fix it.

Thank you

Naywyn - July 28, 2015, 10:48 am

Hello, get the last update please -> <http://pastebin.com/NEhLwtKy>

hunters - July 28, 2015, 10:52 am

nice. its working perfectly. thank you again for this awesome theme @AeroRev9

Naywyn - July 28, 2015, 2:57 pm

An update is out, make sure you have the latest version.

29/07

Pens and brushes are now disposed.

TabControl text drawing is now aligned.

TabControl is now supporting images.

FirefoxH1 is now inheriting of Label.

High quality drawing on FirefoxMainTabControl.

Radiobuttons can't be unchecked.

When a Radiobutton is checked, the other one in the parent are automatically unchecked.

NETExplorer - July 28, 2015, 5:11 pm

High quality drawing on FirefoxMainTabControl.

I really like this theme, add a numeric up down and other essential controls

hunters - July 29, 2015, 1:57 am

hey, please ix the radio button issue. Radio button is work like a checkbox. please fix it. Maybe that will be good for us.

Naywyn - July 29, 2015, 1:58 am

(Jul 29, 2015 01:57 AM)hunters Wrote: [\[CITE\]](#) hey, please ix the radio button issue. Radio button is work like a checkbox. please fix it. Maybe that will be good for us.

It's fixed in the new update. :)

hunters - July 29, 2015, 3:11 am

(Jul 29, 2015 01:58 AM)AeroRev9 Wrote: [\[CITE\]](#) It's fixed in the new update. :)
nice to hear that. thank you. ?

Naywyn - July 29, 2015, 4:32 am

A new update is out, a NumericUpDown control has been added, pastebin link is updated. :)

29/07 (2)

Textboxes may be correctly disabled in designer.

FirefoxNumericUpDown control has been added.

NumericUpDown can be disabled.

Textboxes forecolor is now updated when disabled.

Josh? - July 29, 2015, 4:39 am

This is a nice release, I hope you keep updating and improving it ?

N3oNight - July 29, 2015, 5:37 am

you must all 10 Controls name on the thread so any user like me can know if he can use this theme or not.

BTW is there a radiobox and groupbox in that 10 controls?

raider101 - July 29, 2015, 5:38 am

(Jul 29, 2015 05:37 AM)N3oNight Wrote: [\[CITE\]](#) you must all 10 Controls name on the thread so any user like me can know if he can use this theme or not.

BTW is there a radiobox and groupbox in that 10 controls?

No group box, but has radio buttons yh

Odus - July 29, 2015, 8:17 am

(Jul 29, 2015 05:37 AM)N3oNight Wrote: [\[CITE\]](#) you must all 10 Controls name on the thread so any user like me can know if he can use this theme or not.

BTW is there a radiobox and groupbox in that 10 controls?

Easy way would be to compile and see yourself ?

- Button
- CheckBox
- 2x Label
- TabControl
- NumericUpDown
- RadioButton
- LinkLabel(?)
- 2x TabControl (vertical & horizontal)
- TextBox

TRH4CK - July 29, 2015, 8:26 am

This looks way too good! Better than firefox imo xD Good job!

Naywyn - July 29, 2015, 8:36 am

(Jul 29, 2015 08:17 AM)Odus Wrote: [\[CITE\]](#) - LinkLabel(?)

No, the control is not inheriting from LinkLabel, because a LinkLabel is always underlined, in the default firefox option page, when the control isn't hovered, it's not underlined. I know you can disable the underline thing, but I preferred to do in this way.

OffCode - July 29, 2015, 9:54 am

This looks so nice! Thank you for Release! :)

Gj!

Pharmacist - July 29, 2015, 9:59 pm

omfg, I love it so much!

This is a paid theme.. People would pay good for this shit! <3

Snoweyes - July 30, 2015, 12:43 am

That look really cool! Well done.

Cecilia - July 30, 2015, 3:01 am

For those who want a C# version:

Your theme, up to you :)

I did little but fix errors >_<

DragonTTK - July 30, 2015, 1:46 pm

Nice little theme i like it :)

HackandBot - July 30, 2015, 3:45 pm

When add your code in my Project i got a lot of error. How to fix it? Need ThemeBase of AeonHack's? If yes which version? Thank you for your amazing Theme

eCoLoGy - July 31, 2015, 3:06 am

Awesome theme mate!

Keep it up! ?

Naywyn - July 31, 2015, 3:30 am

(Jul 30, 2015 03:45 PM)HackandBot Wrote: [\[CITE\]](#) When add your code in my Project i got a lot of error. How to fix it? Need ThemeBase of AeonHack's? If yes which version? Thank you for your amazing Theme

No, just create a class, delete everything in the created class, and paste the theme code.

backtrack - August 3, 2015, 1:07 am

how to setup logo in tab control buttons...? like you setup search logo etc... i cannot find how to do this...

Read the main post, everything is explained. ?

hunters - August 7, 2015, 4:32 pm

we want more controls pleaseeeeeee.... awesome theme.. i love it

iLogic™ - August 7, 2015, 11:46 pm

Nice one bro ! Keep doing themes ?

Astek - August 8, 2015, 10:17 pm

sick theme! thanks for this

Toby Allen John - August 9, 2015, 6:18 am

Oh wow, good stuff. Vouch. Thanks OP!

SKRIKXX - August 9, 2015, 10:23 am

WoW Nice Theme bro :)

Like it ^-^

SIM-2564555 - August 9, 2015, 2:44 pm

thanxxxxxx man nice work go .. wanna to see more nice themes

Envil - September 14, 2015, 12:34 pm

Hi!

I need some help :/

When I`m creating Tab Control and I write some long text (ex. Special Features), some of letters are just crashing. "Button space" ends in some area.

Please, how I can fix it?

Thanks! imgur.com/8iOwEac

hackerjojuk - December 18, 2015, 11:04 am

Thank you :) for thread good.

Phoenix - December 22, 2015, 11:04 am

nice theme , thanks for the share
