Thread: [Find out if you're color blind. I know I am :\(](#)

illuminaughty - July 25, 2015, 4:10 pm

So I took this test only to find out that my vision is shit.

Heres my result:

Spoiler [\(Click to View\)](#)

Heres the test: <http://enchroma.com/test/instructions/>

I really hope im not the only one....

Capo™ - July 25, 2015, 4:20 pm

It's all that weed you smoke bruh

Febreze - July 25, 2015, 4:22 pm

Can you get an accurate color blind test via a computer screen?

takin test

Fiz? - July 25, 2015, 4:23 pm

I got normal color vision as well.

Schrader - July 25, 2015, 4:24 pm

I got "Normal Color Vision"

Quote:You were able to see the hidden shape in all or nearly all of the test conditions. This indicates a high probability of having normal color vision.

When people with normal color vision wear the EnChroma Cx glasses, they see a "color boost" effect: colors appear to "pop" with a super-ordinary vibrance. This effect, called chromatic contrast enhancement, is how the Cx also helps people with color blindness.

A complete diagnosis of color vision deficiency is not possible using remote testing. We recommend you try the EnChroma glasses and return them if it does not work. All EnChroma products are satisfaction-guaranteed within 30 days of purchase.

NoHax - July 25, 2015, 4:25 pm

I got the normal color vision.

YAY!

illuminaughty - July 25, 2015, 4:25 pm

WTF. My eyes have always been bad lol

Febreze - July 25, 2015, 4:26 pm

the fuck. I want other tests to back this up.

Eternal. - July 25, 2015, 4:27 pm

I am not color blind, this is a good thing.

illuminaughty - July 25, 2015, 4:27 pm

(Jul 25, 2015 04:26 PM)Febreze Wrote: [\[CITE\]](#) the fuck. I want other tests to back this up.

That shit sounds dangerous as fuck. You should see a doctor.

Orchid - July 25, 2015, 9:57 pm

Normal Color Vision

You were able to see the hidden shape in all or nearly all of the test conditions. This indicates a high probability of having normal color vision.

When people with normal color vision wear the EnChroma Cx glasses, they see a “color boost” effect: colors appear to “pop” with a super-ordinary vibrance. This effect, called chromatic contrast enhancement, is how the Cx also helps people with color blindness.

scam. - July 25, 2015, 9:59 pm

It also depends on monitors color calibration.

wtf is this shit. Can anyone see this shit? No trole pls.

iRead - July 27, 2015, 10:58 pm

I'm still blind as fuck though

joshythejew - July 28, 2015, 3:44 am
Happily not colour blind thank god!

brokers - July 28, 2015, 3:52 am
"Mild protans ("pro-tans") have a mild form of red-green color blindness caused by an anomaly in the L-cone photopigment gene sequence."
Kinda knew that, was hard to read red chalk on green chalkboards in school :P

Vrekt - July 28, 2015, 3:59 am

I got normal color vision. I only couldn't see a 2-3, I don't think there was anything there tho, I was assuming every image had an number.

FREEBANDZ - July 28, 2015, 4:26 am

Normal for me. Some of those numbers were hard to view

Skidy - July 28, 2015, 4:28 am

Blusspider - July 28, 2015, 4:28 am

Great day, Any update here in HF

ReyalsNomeD - July 28, 2015, 4:35 am

Normal color view. Happy af. Thanks for the test, Op :D
-Greetings, Nomed.

illuminaughty - July 28, 2015, 2:25 pm

What are you talking about? Updates about what?

DiscipleTwitter - July 28, 2015, 6:29 pm

Ah man! I am normal! Good shit. I got scared.

The Godfather - July 28, 2015, 6:30 pm

I won't waste my time doing this, I know damn well I'm not color blind.

illuminaughty - July 28, 2015, 6:33 pm

(Jul 28, 2015 06:30 PM)The Godfather Wrote: [\[CITE\]](#) I won't waste my time doing this, I know damn well I'm not color blind.

But you wasted your time posting for no reason instead?
I thought I wasn't until I took the test, lol.

Expels - July 28, 2015, 6:34 pm

I got that normal color vision. yeye :)

?ovu - July 29, 2015, 6:37 pm

Normal color vision. Hooray.

!?! ?z? ???? - July 30, 2015, 9:37 am

I just got normal vision :D

Durham - July 30, 2015, 1:01 pm

Oh, Im not color blind.

Stikman - July 30, 2015, 1:11 pm

Well.. I am red-green colorblind but I already knew that.. :/

CMxCV - July 30, 2015, 1:11 pm

I am only slightly color blind lol.

eXplorer.eXe - July 30, 2015, 1:18 pm

Im not color blind.

Shot Caller - July 30, 2015, 1:36 pm

You were able to see the hidden shape in all or nearly all of the test conditions. This indicates a high probability of having normal color vision.

I'm good

Rob Gronkowski - July 30, 2015, 3:14 pm

[img]<http://s15.postimg.org/dhyfdti4r/image.jpg>[/img]

Ornstien - July 30, 2015, 3:21 pm

Its ok I got the same thing except its "EXTREME"

The Scarabian - July 30, 2015, 3:31 pm

Took the test a few times, every time got deutan and protan.

Gem - July 30, 2015, 3:41 pm

Sooo, eh okay

Paul Wilson - July 30, 2015, 7:39 pm

Completely normal

lel m80s get rekt

Filthy Frank•??? ? - July 30, 2015, 7:43 pm

I doubt using a test online is legit though.

OsulMofo - July 31, 2015, 3:53 am

(Jul 25, 2015 09:59 PM)Mael Wrote: [\[CITE\]](#) It also depends on monitors color calibration.

wtf is this shit. Can anyone see this shit? No trole pls.

just finished

Thats a 7

For my school I also had to take tests like these and got a 100% perfect score...

CJamie - August 2, 2015, 1:13 am

Got a normal color vision. YEAH.

George Daniel - August 2, 2015, 1:47 am

"You were able to see the hidden shape in all or nearly all of the test conditions. This indicates a high probability of having normal color vision."

I am doing pretty well. :D

Year - August 2, 2015, 1:58 am

Wasn't as hard as I thought it would be.

Jarrett - August 2, 2015, 2:01 am

Took the test for this and did really good on it. :P

woahxx - August 2, 2015, 3:02 am

I'm 50/50. Worst one I ever did was thinking the blue bus-seats was black..

Top or Feed - August 2, 2015, 3:06 am

The whole test is just a way to get you to buy their 400 fuking dollar glasses

LelCate - August 2, 2015, 3:08 am

It tells me I have normal vision.

However, some of the number/color combinations are hard af.

I think I skipped like 5, maybe more.

OP has no reason to be sad imo, there's way worse eye conditions than slight color blindness.

I know someone with a +9 correction.

Private Network - August 2, 2015, 3:09 am

(Aug 2, 2015 03:09 AM)Private Network Wrote: [\[CITE\]](#) I can see the left one, but not the right one.

Same problem here lol. Fuck this shit lol

Obli - August 2, 2015, 3:25 am

(Jul 25, 2015 04:25 PM)illuminaughty Wrote: [\[CITE\]](#) WTF. My eyes have always been bad lol

You're just trying to justify the (probably) fallacious pseudo-diagnosis provided by a site that promotes color blindness vision glasses.

Mr. Thijs - August 2, 2015, 3:45 am

(Aug 2, 2015 03:09 AM)Private Network Wrote: [\[CITE\]](#) I can see the left one, but not the right one.

The right one is a three.

I have normal color vision tho.

Private Network - August 2, 2015, 3:51 am

(Aug 2, 2015 03:45 AM)iSpeaB Wrote: [\[CITE\]](#) The right one is a three.

I have normal color vision tho.

No lmao, the right one is a 1.

Squint your eyes and look at previous replies.

EziNet - August 3, 2015, 3:12 am

Normal Color Vision

You were able to see the hidden shape in all or nearly all of the test conditions. This indicates a high probability of having normal color vision.

When people with normal color vision wear the EnChroma Cx glasses, they see a “color boost” effect: colors appear to “pop” with a super-ordinary vibrance. This effect, called chromatic contrast enhancement, is how the Cx also helps people with color blindness.

A complete diagnosis of color vision deficiency is not possible using remote testing. We recommend you try the EnChroma glasses and return them if it does not work. All EnChroma products are satisfaction-guaranteed within 30 days of purchase.
