Thread: [\[\\$4.95 AUTOBUY\] TeamViewer Online PC Checker | Check Computers | Stop losing time!](#)

LordCoder - July 25, 2015, 4:42 pm

TeamViewer Online PC Checker - Stop wasting your time.

Bought a TeamViewer account generator but tired of checking them manually for online computers? Have you got valid accounts but want to check them quickly for computers? Then this is your tool. Just input your accounts with the format user:password. Then click "Start checking" and wait a few minutes. After that, you'll see all the online computers without having to click any other button. You must have your accounts already cracked. This isn't a cracker, this is a checker

Screenshot

Price: \$5 LIFETIME

No more vouch copies available.

Click on the image to buy it. After purchasing, send me a PM for the serial.

TOS:

- I have the right to ban your license for any reason
- Don't try to unpack/decompile my software
- All sales are final.

Regards,
LordCoder

Mr. WAVES - July 25, 2015, 4:44 pm

Looks like a nice product. Good luck with sales.

Thanks! If you want a vouch copy, I'm giving them out.

Beznadzieja - July 25, 2015, 4:47 pm

Could I get vouch copy?

Or 1h trial?

Looks like nice product, I am really intrested!

glws

professional user and his products are HQ

also helped me very fast!

IntelliJ - July 26, 2015, 2:20 pm

So I purchased this. At \$2, it's what'd you expect. To the extent of my knowledge, the product works. I currently have it stopped as I have a list of sixteen thousand combos to check and you do hear the "click" of the accounts checking so I've paused it and I'll run it overnight. The program doesn't use NetSeal which is nice, and allows you to export invalid accounts which is also a very nice feature.

I'll update with how it goes overnight.

Thanks for your quick review. Remember that the main task isn't for cracking, but for checking which of those have online computers.

Regards,

Rapierz - July 26, 2015, 3:11 pm

Oh nice~

I made one for myself when I was the only one who sell teamviewer gen.
Good to see someone got the same idea as mine ;)

Indeed, had this problem when I saw your generator. So I made this checker. Thanks for posting!

Rapierz - July 26, 2015, 3:36 pm

It was very boring to check single one of them manually XD
Goodluck with sales!

LordCoder - July 26, 2015, 3:38 pm

Information for all users:

Sometimes TeamViewer login page shows up a reCAPTCHA. As I wanted to make it autopilot, it will just refresh and retry so the captcha disappears. There's no need to implement a proxy for the moment.

Regards,
LordCoder

Prødigy - July 27, 2015, 9:43 am

Can this be used as a cracker as well?

LordCoder - July 27, 2015, 9:44 am

(Jul 27, 2015 09:43 AM)Dabomb1177 Wrote: [\[CITE\]](#) Can this be used as a cracker as well?
Yes of course, you can export the working accounts easily.

Beznadzieja - July 27, 2015, 3:04 pm

I received a copy of this product and this is my honest opinion about it.

I used TV PC checker for few days now and I have to admit that it gets job done.
It has simple layout that contains everything you need and it's really easy to use.
What's most important - this checker is super stable! I checked a huge amount of accounts and didn't encountered any problems.
Overall I think it's pretty much steal for 5 bucks, if you look how much time it saves you. ?

LordCoder - July 28, 2015, 8:51 am

Thanks for your review.

I'm developing new features, I'll PM all customers so they can have the latest version.

LordCoder - July 29, 2015, 2:04 pm

Selling this, working perfectly bypassing the captcha. Get your copy today.

LordCoder - August 2, 2015, 10:57 am

All problems have been fixed, including the Windows 10 problem. Now the checker is working fine with auto-update.

Regards,

Hinch - August 2, 2015, 3:14 pm

please tell me this is proxyless

LordCoder - August 2, 2015, 3:48 pm

(Aug 2, 2015 03:14 PM)Hinch Wrote: [\[CITE\]](#) please tell me this is proxyless
TeamViewer login page doesn't have IP check. The only check they have is a reCAPTCHA, but

refreshing the webpage a few times bypasses it. That's why it doesn't have proxy.

However, if for some reason it stops you working without proxies, I will add proxies for the next update.

Regards,

LordCoder - August 8, 2015, 4:14 pm

I'm reopening this. I have changed some stuff in the description. This is a checker, not a cracker.

KeelanxHacks - August 8, 2015, 11:27 pm

This would have been very useful, now my TV account is flagged as commercial use. Should have bought this sooner.

kryptonic1337 - August 9, 2015, 5:04 am

Just paid through btc havent recieved any email or anything :l

hey man just purchased and I cant pm due to 23 posts. If you could send me the reg key in a pm that would be nice, thank you!

(Aug 25, 2015 01:22 PM)Kygl3t\$ Wrote: [\[CITE\]](#) Always on ?

Thanks for response.

What do you mean exactly?

Kygl3t\$ - August 26, 2015, 6:56 am

I would buy it
still for sale ?

findingnature - August 26, 2015, 6:59 am

I would be interested if I could find a place to buy lists.

LordCoder - August 26, 2015, 7:23 am

(Aug 26, 2015 06:56 AM)Kygl3t\$ Wrote: [\[CITE\]](#) I would buy it
still for sale ?

Yes, still for sale. Remember, this is a checker. If you try to use as a cracker, you'll get a lot of invalids.

(Aug 26, 2015 06:59 AM)DIGIT?L Wrote: [\[CITE\]](#) I would be interested if I could find a place to buy lists.

Some people have a huge TV db. Dunno where they get it though.

Kygl3t\$ - August 27, 2015, 2:26 pm

great program !

thanks for work.

LordCoder - August 31, 2015, 3:49 pm

Still selling, hit me up if you need the checker.

LordCoder - October 7, 2015, 6:40 am

Updated the checker, it seems TeamViewer changed the way it works a bit. Working nice now.

findingnature - October 7, 2015, 6:54 am

I'd buy this if I knew where to get TV accounts. GLWS.

LordCoder - October 7, 2015, 7:00 am

(Oct 7, 2015 06:54 AM)DIGIT?L Wrote: [\[CITE\]](#) I'd buy this if I knew where to get TV accounts. GLWS.

There are some forums which I cannot mention that provide nice combo lists. Then you can test any TV cracker, but it seems there's no TV account cracker working.

Patrick Jane - October 7, 2015, 5:43 pm

Vouch for LordCoder, don't hesitate to deal with him!

LordCoder - October 8, 2015, 11:31 am

Thanks mate! ?

Purplemeer - October 8, 2015, 11:34 am

Sounds stupid but what can I do with the teamviewer accounts?

Never saw this before :p

LordCoder - October 8, 2015, 11:36 am

(Oct 8, 2015 11:34 AM)Zakenman Wrote: [\[CITE\]](#) Sounds stupid but what can I do with the teamviewer accounts?

Never saw this before :p

Well, TeamViewers are usually linked to computers (that's the main point of it lol). This means you can open the computers by yourself and execute your stub on their computers.

CodeBinary - October 8, 2015, 1:26 pm

Wow I have 650+ Accounts needing to be checked thisll come in handy

stackoverflowin - October 8, 2015, 1:51 pm

What can you do with this once you see a computer is online?

LordCoder - October 8, 2015, 1:53 pm

(Oct 8, 2015 01:51 PM)StackOverlowin Wrote: [\[CITE\]](#) What can you do with this once you see a computer is online?

Whatever you want, I cannot help you with this question. Most people use it for black hatting.

stackoverflowin - October 8, 2015, 1:54 pm
