Well this is convenient I was actually looking for a [Tablet](#).

Thanks for the heads up.

Good find OP, this is what this section is all about.

**Double A** - July 26, 2015, 7:53 pm

Damn i was gonna buy it but seems it has bad reviews and stuff not gonna risk

You can't expect superior performance on a cheap tablet - I have a tablet with the exact same specs as this and it runs surprisingly smooth with average use (microsoft office, browsing the internet etc.)
