Thread: [\[Online Protection\] \[Funding Required\] THATS - Tor Hidden Anti-Terrorism Service](#)

jonnyboo6777 - July 26, 2015, 12:04 pm

We are very excited about this new project that will benefit the entire world. From protecting young children worldwide, to intercepting terrorist attacks, we're sure everyone will see a benefit.

We are a non-profit organisation that aims to secure the online world by, in a sense, policing the internet to make sure that people are not abused online. Any abuse can be reported and we can take appropriate action. Your funding will help us to keep the internet a nice place and to keep our servers up and running. We plan to keep our users updated on what we are doing and future projects. Your funding will also keep our website up so we can keep users up to date. We also give everyone a voice on what happens to everything on the internet. For example, if a particular site was put up for something that wasn't exactly infringing the rules enough for us to take it down then we would call a vote to see if a majority wanted the site alive or taken down. This unique idea of voice for people will help us create an internet that people enjoy browsing.

We are not against hacking in general, we are against child exploitation and actions that cause a person's death etc.

We plan to start on the darkweb and then work our way up to the clearnet.

We started when a friend of mine noticed that the internet is like an unpoliced metropolitan city. It had started off as nice as anything and then has worsened over the past few years with social media being a place of everything now. However, we do not plan to intervene with social media websites, we are just implying that social media is also a free advertising method for other sites that include (but not limited to), Child Pornography; Trolling Sites; Illegal sites etc. These sites are like shops. They open and there is no one that shuts them down because they are illegal or bullies/trolls other people. Once this has started it is hard to stop, but with your support we hope we can bring peace back to the internet and hopefully make the internet a place for everyone, for everything, everywhere.

We hope you understand that patrolling the internet is going to be very hard. That is why we need the funding to help us get the equipment we need to do this. There is one problem that will take lots of time to go away. This project isn't like most other projects in that this project is an ongoing thing. It will take a lot of time to sort these things out and even then it will have to be looked after to make sure nothing like this pops up. We have the skills needed for this project and we hope that you can help us make your life on the internet a better one. Above all of this, we are also dedicated to serving the people who really make this world a good one. All of the hard working people working for organizations such as Christian Aid, etc.

To fund our project, we are using a decentralized bitcoin crowdfunding serviced called lighthouse. You can read more about and download this program at the following site: <https://www.vinumeris.com/lighthouse>. To fund the project you must follow a few steps to add bitcoins to your lighthouse wallet and then fund us. The steps are as follows:

1. Download the program and install it
2. Run the program and send the amount of bitcoins to the address located at the top (don't forget to add in the fees that are required in the bitcoin protocol)
3. Download the project files from <https://mega.nz/#!g4pzmCrJ!CxxkNgIevFLO0pUiHss7wV5VKww-yKQF7m5ihBFpzdRs>
4. Click on the 'Import Project' button within lighthouse, find and import the project you downloaded.
5. Open the project that has appeared on the lighthouse interface (if it has not already opened).
6. Click the pledge button and enter the amount you wish to fund us with.
7. Send the file which will have been created to THATS@riseup.net
8. Your money will stay in your account until we reach enough funding and we claim it which means

that if we are not funded then you keep your bitcoins.
9. Enjoy your day.

HIGH PAID FELLA - July 26, 2015, 12:07 pm

to which adres i send bitcoins ? i want support that idea

jonnyboo6777 - July 26, 2015, 12:10 pm

You use the pledge button within lighthouse which therefore creates a file to send to our email address. If you're wondering how to add the bitcoins to send to us the address is mentioned at the top of the lighthouse application.

The way we are enforcing it has been tested and our ability to take down sites works. We cannot tell you how we go about doing this but all I can tell you is that it works.

For most sites we will have a vote on if we should take down the site or not. Usually, if the site contains child pornography and we can prove that to ourselves then we will have no need to have a vote but for the rest of the sites, we will.

why u need money to down site ?

u pay for exploit?

Yoshikage Kira - July 26, 2015, 12:21 pm

wouldn't it be funny if op was actually fundraising money for and not against these sorts of things?

jonnyboo6777 - July 26, 2015, 12:24 pm

We need money to pay for electricity and housing for our equipment and the internet required to do so.

We will require hosting two servers to keep our project alive. On top of that, we will also need to know that people want to help us and that we are not just doing it for the sake of it but for the protection of people that use the internet.

(Jul 26, 2015 12:21 PM)Gr?ed Wrote: [\[CITE\]](#) wouldn't it be funny if op was actually fundraising money for and not against these sorts of things?

It would hardly be anti-terrorism then would it. Besides, I don't know anyone that would want to do that under the idea of online protection. However, I may stand to be corrected.

Viktory - July 26, 2015, 5:54 pm

sorry papa always said do not trust strangers

Filthy Frank•??? ? - July 26, 2015, 5:56 pm

i send u bitcoin nd u hack mee?

jonnyboo6777 - July 27, 2015, 2:17 am

Our plan is to clean up the darknet so as to make it a safer place for everyone. Of course, doing this will take time so we require funding to set everything up and continue to exist as a service.

1336plus1 - July 27, 2015, 1:57 pm

How do you plan to "take down" those "terrorist sites"?

How do we know you are legitimate? Maybe you should add some information about yourself, so we can trust you with our money.

SIM-1073426 - July 27, 2015, 5:37 pm

yes hello im also in this project if you want to make the internet a better place you NEED to send me money. thanks in advance and have a happy hunka.

Chillingworth - July 28, 2015, 8:52 am

Oh lord, another group of inept Internet vigilantes.
